

439th Knowledge Seekers Workshop June 30th 2022

(Quick Index 15 p, Introduction , topic index ; Transcription proofing done, Need to do ; Key Phrases, Words) (Auto transcripts Elias)

See light of your own Soul - "I am you" - enlightenment by a machine; KF T released to public

Topic Index:

KF releases 3 types of technology to public - Plasma Enhanced Systems for Car and Home - 2 Wellness Centers in Rome using Plasma T - KF T used to make all Nuclear Reactors safe - create a Dome of Peace with M fields;

Your soul heals you, the system only provides the environment ; Man has frog leaped in knowledge beyond UFOs envy of U; STM engages P transfers energy not mass; We control travel not wait for dream time; Health Centers - prices high but 100% guaranteed recovery or refunded; Will deliver in 8 weeks a system to transmute matter objects - factory to home delivery instantaneously; First time Iranian government allows KF to register as private space company; Persian Gulf Oil industry change within 2 years - Iran will see no nation suffers; T cannot be stopped because it's not in the head anymore - in machines that work and see outcome; Iran will delivery the safe nuclear T across planet; Vienna 5plus1 talks will resume soon - come to conclusion; IAEA asked to test new T in Iran; KF will be part of new space city to be built; Remain connected once you leave Flight Room; Don't need to eat as much; First Dog Mozhan in FS: Every cell in body has STP; No one should die from Carbon Monoxide poisoning - change energy with Gans; CO blocks energy transfer in blood not chemicals; Train your lungs to absorb energies from U - can walk in space without suit; Headaches from brain cell repairing; 3 Chairs in flight room reduced to 1 Chair - 3 in 1; Car systems have 2 halves 1 side deliveries energy while other side recharges - like heart and brain work; Free Energy is premature for man; New UC members to come in; Language transmitted through flight system - others hear you in their language through the soul; KS respond immediately to call for assistance; Treating wounds from war with Gans in Ukraine; Treating Plasma burns; Ex-Prime Minister Sharon treated as human being plasma used to reverse coma; We are obligated to treat all wounded people regardless of military status; STM punishes physicality for taking another life; American soldiers with mental illness for killing; Countries that don't dub movies - people learn languages fast;

See light of your own Soul - "I am you" - enlightenment;
People in flight room report seeing their own soul, it speaks to them I am you - they get enlightened to the truth of their creation; Their life changes; First time man meets his own soul - it listens to physicality and takes him around U; Collaboration between STM and P; Soul can be in more then one location; Mr. Keshe waiting for time when Beautiful People (Schizophrenic) go into the system - reveal truth to parents and medical professionals - to stop abuse.

Introduction to Quick Index 439 KSW

The main topic of interest that struck me most in this workshop was not the long awaited release of the plasma technology to the public, but rather a few paragraphs at the end, which talk about how the flight enhancement unit is helping to enlighten people. Enlightenment is of extreme importance, because even in traditional spirituality, especially of India, a great sage came to the conclusion that enlightenment would be the first step towards the dawning of a new race for humanity. In eastern civilization enlightenment was considered extremely difficult and rare, and in western civilization it is simply a concept of little importance to the mass population. And now to utter amazement, the technology of KF has reached such a level beyond imagination, that a "machine" can help to enlighten anybody who wishes to enter. Of course, we are not talking about an ordinary machine mankind is used to, but an entity radiating unconditional love for all plasmas.

I only bring this up, so that we do not miss out on the importance of this workshop. The participants have reported to Mr. Keshe, that they see the light within themselves, and it says to them, "I am you. I am your Soul." Then they see a change in their life. It may not be obvious to most people who are bombarded by the "spiritual marketplace," but this in fact is, the goal of all true spiritual practices, since the beginning.

In the spiritual traditions it was the sage, or "enlightened Master" who was the MaGrav, and whose field strength and connection to the Creator was strong enough to enlighten others. Now it is the Flight Enhancement Unit, that is the enlightened Master. And it would appear that the power of his field strength is beyond anything we have ever seen on Earth. But still this is limited by the thinking of the past, that some great being is going to save us. But who knows? Maybe there is an element of truth in this.

Do we call it the grace of the Creator and Mitra, that the power of the Enhancement Unit will spread across the planet by the people who go into it. There have already been 80 people who have entered the system, and they are spreading the light, knowledge and love across the planet. Even the ones who go in the first time and say they don't feel anything, when they come back again, they receive. And the system is continually being adjusted, so that it can reach everybody. It's not like other times in Mankind's history. This time it cannot and will not fail.

The 439 KSW is filled with so much wonderful information and hope, please spend time pondering it over. Some of the main points are as follows. The reason for the 3 Chairs are explained, and that they will all be combined together into just 1 Chair. They received the knowledge they were looking for. You don't fly, that's for physicality, you go to places instantly with the soul. The STM now encages the P and you feel like you are inside something and then not only does your P become perfected, but you can travel to where you wish, instantly, and you can live in both worlds. There's the release of the 3 parts of the technology, for the car and home, health, and safe nuclear power. Humanity is not yet ready for total free energy, that will come later. What is being released is not the MaGrav

we are used to. It's an advancement in technology. Since we had our chance with the MaGravs but we did not understand it, KF will handle the development.

Remember that KF is a space travel agency, do not ask them for healing your health conditions. You can now go to the KF Store and book for Rome KF Wellness Center for certain diseases, that will gradually expand over time.

It's a wonderful and amazing time that dawned on us. Mr. Keshe is fulfilling all his promises to us. He said, 2022 is the year the technology will be released to public, and it is only July.

Thank you for listening.

Quick Index

Man was sitting on donkey watching UFOs - Now people in UFOs sitting on donkey watching man travel with his soul; Man was gifted knowledge of U by grace of God; Huge leap in understanding T; The knowledge was hidden within the man - now it manifests; KF taking time off for next 2 weeks;

You go through 3 Chairs to balance P, STP, and STM before entering the main Flight System (FS).

Chair 1 - allows the energy of the physical cells to balance.

Chair 2 - brings collective cells in operation to be unified. Then you feel as a human being, with some sort of feelings for the energies.

Chair 3 - (extend feeling to whole being), physicality becomes embedded in the STM.

Flight System - You are in the condition of the soul

Now instead of transporting a 100 kg human body - we only move the energy fields; STM acts like an envelope and carries the physicality, all its contents with; The M fields of plasma have no weight, it does not carry mass. "It carries field interactions, if you match the G field dot point, you move instantaneously." (We have already tried this in the system.)

When the STM encages the P, it's like being in a room and you hear a voice outside. You are not outside to do anything about it, because you're cocooned by the room.

Now we can control the space travel, we don't have to wait for one day, that you might dream about your mother who passed away. Now you can decide to travel to your mother with the soul, and feel the love.

Somebody who came the first time didn't feel anything and he said, the system doesn't work. It's not that the system doesn't work, but we haven't managed to cover you. People who went in the first time without feeling anything, when they came back and went in again, this time when they came out of the system it was totally different, they had very

interesting experiences. It means the souls had to be adjusted, they needed to understand what is going on.

One person went to his house and moved a flower pot, so when he goes back home he can see if he really was there. In this process, you have become the travelers of space by your wish, and not by the dream. When we ask people to fly, instantaneously they fly.

In the future, we may test to see if 100 of you can go to New York for a party. (We have to build systems to receive you.)

(In Iran they broadcasted KF as one of the 4 new T.)

KF will release "Plasma Enhanced Systems" in July to the world population. It's not a MaGrav, we call it a system, which allows you to enhance the energy in your environment. Which means you can reduce the fuel costs by extending the use of the battery in a hybrid or electric cars. If you do 1,000 kilometers on one charge, now you can do 2, 3, 4000 kilometers on one charge.

It is not a free standing power generator, because we don't see a need for that at this moment. KF will release 3,000 of these units. They will cost 5,000 Euros, and first discounts at 4,000. We guarantee delivery, (to be sent) out of our factories before end of July.

These are a trail system, we would like you to report back how they work and what savings you achieved.

(There are also the new enhancement energy generators for the home.)

"You work with the energy of the house during the daytime, which is nothing, but your system backs up with, for the nighttime."

At the moment, they support between 1 and 2 kilowatts, maybe 3. If we achieve our target in the next 12 months, which is a free standing (power) unit, we will upgrade this one for the new freestanding unit. (You will not have to pay for the upgrade. Unless you want to.) (These systems are Universal plasma energy production systems.)

We are not selling you MaGrav units. We are selling you a technology as a package, which enhances the energy use. (If you are using 3 kilowatts a day, (maybe) the system will supply 2 kilowatts.)

(KF has responded to your call for help. We hope to improve these systems quickly. Not like when I gave you the MaGrav Units, and you did not understand what to do with them. Keshe Foundation has completed the cycle.)

We have a specific reason why we don't claim a (power) generator or whatever. This is because we are developing a new plasma Technology enhancing the energy production. (KF will be part of an international organization - will be announced soon.)

Go to the KF Store and place your order. (We guarantee delivery, in the order they are received. First come first serve.)

(We gave you 7 years to develop the MaGrav. We'll try to achieve a free standing power system for cars and home use.)

We will deliver what we call, free wireless energy transportation in a very short time. (These systems have already been tested in the test flight center in Linz. We have seen the performance.)

These systems were in the patents about 15 years ago, where we spoke about wireless energy transfer in the home. We see a need for it in maybe in the next 12 months. (You unplug all your electric equipments from the house grid, and plug it into a Unit, which KF will develop and give you. When you come home and you think - the lights come on - they will light up, and to the brightness you want. This is the same thing you do when you come into the EU in Linz. When I tell you to go and see your mother, your thoughts click on, and you go see your mother. It's the same process.)

You can use this technology for your hybrid and electric cars, and for use in your home. You just plug it in. "It's not as good easy as you had it with a MaGrav. This is a system, it's not a MaGrav box. It has electrical, electronic systems in it, which controls a process, adjusting the field." But you have to purchase on your own, a large 12 volt car battery for supporting the system.

(The next thing you asked us for was to use the technology (T) for health. On the health application for the T, we have reached an agreement with two groups, one in South America and one in Rome, Italy. These centers are supported by medical doctors and can process any diseases which the KF announces.) You can book on the KF website.

We don't enter medical application. We are the providers of the technology. A team of doctors will provide the services. Conditions like Fibromyalgia, CVS, Alzheimer's, autism, herpes, and others will be added to the list step by step.

The costs will be high, but we guarantee that if you do not receive 100% recovery, you will be refunded. Our goal is to eradicate a condition, not just temporarily relief.

KF has a certificate from naturopathic organization of Belgium to provide such a technology. It's our right for the license we have. This was not disclosed in the court of Belgium - defrauding by a nation. In this process we deliver CE certified technologies and machineries to the centers. On 15th of December the first center in Uruguay will open up. And from there, we'll expand into Brazil, Mexico, and the rest. All our centers will have a "call center" where you call in, when you have a problem. The patients are monitored 24 hours a day.

We are not here just to sell technology. We are here to guarantee the health of the future of mankind.

We are providers of the technology and we don't get involved in medical applications.

Keshe Foundation Wellness Center in Rome will have two locations, and handled by expert doctors in the field. They'll be trained by the KF in use of the most advanced technology systems.

We are a scientific organization, we don't want to get involved in delivering the technology. We will do the same with agriculture, and with energy in a very short time. Once the first 3,000 units are delivered, when everything is perfectly done and we have adjusted what needs adjusting, (then we'll license out the systems to be manufactured by large corporations.)

We are not selling you MaGrav system. We're not selling, promoting a free standing power generator. These are enhancement energy units, and we want to know how much we can enhance the production of energy, that it reduces your energy costs.

Hopefully, in up to 8 months, you will be able to use 1 system for both the car and home.

In 6 to 8 weeks we hope to deliver a transmutation of elements system. Transportation of materials directly from the factory to your house. No need for delivery services like Alibaba and Amazon.

We see the next step will create huge amount of jobs around the world, by the development of this technology. We allow the scientific world to join us, to bring this to a rapid conclusion.

We are not a health center do not come to us and say, "I have cancer," or any other disease. We do not want to know, because it's not our job. The health centers are set up for these things. If you come in and you go through the flight process and you find recovery, this is something extra, it's a gift from the space travel.

As I said, your soul does not want you to suffer. It's not our technology. If you suffer from a condition, and if it is gone when you come out of our system, it's not (because) of our system. (All we did was create an environment.) It's you and your soul, which has decided, that it has suffered enough. We are a space travel agency.

It's the first time the Iranian government has allowed an independent space company to be set up and registered. Keshe Space Company has now been set and established in Iran. I have given one assurance, that we will collaborate with the nation of Israel, not the state of Israel, and the same with America as a nation, not as a state, as long as it is warmongering.

The structure of the whole oil industry in Persian Gulf will change within the next two years. Iran will take the lead to deliver the T so that no nation suffers. The standard of living has to stay the same, and life has to be carried on.

The progress in technology cannot be stopped anymore, because it's not in the head of the man, it's in the machinery, which works, and delivers. Transportation and transmutation (T&T) within the next few years will become obsolete the way we do it today.

I see, the use of the nuclear reactors, nuclear technology as energy, as a cornerstone for the next step of the man's endeavor to be able to travel the depth of the Universe, not the Universe. There are reasons for it, and we'll explain as the science of man matures.

All the time I've been asked, are we on the verge of nuclear war? There is no way there can be one, because no nation would be crazy enough to do it. It doesn't matter what stage you stand on.

As we deliver our systems, the fear of nuclear war and accident will be taken away. (We made Fukushima safe using the T, and now in a more advanced way, we'll contain all nuclear reactors at their site.

Nuclear technology will be safe, once you can dome it, not by concrete but by magnetic fields. (The M fields absorb the harmful nuclear radiation, as we have shown in Fukushima. KF in the coming weeks will deliver this technology to every nuclear power stations on this planet. We'll be an organization that makes nuclear T safe, by delivering what we call, "the dome of peace," the dome of non-nuclear.

(This means we'll create a dome of fields that will cover the entire nuclear power station. Then the fear of the nuclear reactors exploding will become absolute zero chance.)

(The failure we have seen in 3 Mile Island, Chernobyl, and in Fukushima will happen, it is inevitable to happen. But this time using the KF technology, which we'll deliver to nuclear centers as a nuclear technology, there will be a dome of safety covering the facility from any accidents. This way every nation can have its nuclear technology, if they want it. The Keshe Foundation with the support of the Iranian nuclear industry, will create these domes of peace. I will deliver this technology through the Iranian nuclear centers. (Then with all the media hype, Iran will not be a nation to fear, but rather a nation needed for the guaranteed safety of all nuclear reactors on this planet.))

(As I said, do not play with the Keshe Foundation, because the technologies we have, are now being delivered. You can encourage your nations to open the nuclear centers, but only if they have the guaranteed safety from the time of commissioning and loading, by the KF technology. This safety technology for nuclear power will come out of the Iranian nuclear center in Natanz.) At the same time we will protect the Natanz center with the new defense plasma technology, so that no one can reach it. The same we'll do with other nuclear power stations around the world.

The cost of the system to be delivered is 100 million Euros, delivered by the Keshe Foundation. Compare this to the 30 billion it costs to build a power station. 100 million is

nothing, when you consider that it guarantees its safety, that no nuclear radiation will leave its premises.

I developed this technology during my student time, over 25 years ago, because I could see the radiation leaks from the Queen Mary College nuclear reactors. It was right in the center of London, in my land. I could not accept it, so I set out to develop a technology, (that the reactor could be safe before it was decommissioned.) We invite IAEA to come to Iran to test it themselves.

This brings a lot of safety to Iranian nuclear technology, where the threat from other nations to bomb them becomes obsolete. I gave the space technology to Iran exactly 14 years ago. For its celebration we give back another technology to Iran, that IAEA requests Iran to deliver the fuel, and the new plasma technologies for doming all nuclear power stations. You cannot operate, if you do not receive certification, a guarantee from what we call, the Iranian nuclear centers backed by the Keshe Foundation technology.

(This was the importance of opening the Linz center, where we could test a lot of these things and bring it within the reach of every single one of you.)

We have a feeling, that the Vienna talk will resume in a very short time. The Americans have stepped down from some of their demands in the past few days. And we will see the resumption of the peace talks and completion of it in the coming weeks. I'll be traveling to Iran, once the negotiations are complete.

It depends on the decision of the Iranian government how we will deliver this T to every nation. I never negotiate from a point of weakness.

(We don't negotiate to take sanctions off. Instead, (let the nations decide if they want a guaranteed safety for all nuclear power stations from explosion, in addition, none of your nuclear silos will break down. But you need to sign the contract with the Iranian nuclear centers. I am an Iranian nuclear physicist, proud to be part of the human race, but forcing the technology to bring peace.)

I gave a lot of good news today. You received your Enhancement Power Units for cars and home, Health and Wellness centers in Italy and Uruguay, and now you have received the gift of safety for every nuclear reactor operating on this planet. The dome, which we have created in Fukushima, without them knowing, officially now comes into work.

We have to understand how the process of Creation is, then we can deliver a system for it.

Literally, if Ukraine situation carries on, you will be in a position of no food and energy. Most of the western world will suffer with shortage of energy. (We've seen that shortage of energy in Iran, and in other parts of the world, where they may cut the power for a day to save energy. Now you can use the enhancement energy Unit to cover it.)

People who have been through the system in Linz speak about not feeling hungry or not wanting to eat. We have built all this into the system, even the wellness factor. We allowed for you to be healed through your soul, not us, we are not involved in it.

Many of you will not feel hunger, because you will have learned how to tap into the energy of the soul to feed yourself. This is the reason for it. You are feeding yourself.

The technology has become a cornerstone for the change, and we are not even in the crawling stage of understanding this T yet. The process of the technology delivery is rapid, from now on we don't hold back

In the coming time, we'll add an additional systems to the new Enhanced Energy Units, which will feed you. The collaboration between the two systems will stop man to kill. In a way, when you buy the first Enhancement Unit for energy, you have preset yourself for the second part as a feeding station.

On the fourth of July, There will be announcement about the KF joining one of the world's leading projects. (I think it means a futuristic city being built somewhere in the world.) KF will be part of this project. In this city, there are no supermarkets or hospitals, and no one will feel hungry. You have already seen it with the 80 people who have been through the flight room in Linz.

We have brought the changes. Once you leave the flight room, you're still connected to it. (It's plasma is above the strength, and all of you who have been in it are connected to the same center.)

Understanding the fundamental process of the creation has brought man to be a leading scientific race in the U. He has done it by a giant leap, that man never could never have imagined. We have delivered what we promised. We have delivered what we came here for, and we will deliver the totality in understanding the process of the creation, step by step.

A participant reported that he lost 4 kg weight since being in the system and is less hungry, he feels constantly connected to the system.

Once you've been in it and you leave it, you're still connected to it and you become a man of peace. The stage for the dome of peace has been set in Linz. Where Linz was the stage for the first large scale destruction of the human race. Now from the ashes, the phoenix has risen.

Try to understand the new technology. I have taught you everything, it's you who has to expand the knowledge. As we are doing. It's you who has to understand the principle behind the knowledge. We do not want that you copycat, but rather understand it.

(Everything we taught you is in this flight room. There is no magic, nothing is hidden. We use MaGrav systems to create field energy. Now you understand the whole of the room is dynamic.)

People who stand in the center of the two systems talk about very powerful energies.

(Way back in the teachings I said to you, that in the flight system you trust your soul with a captain who will deliver you anywhere you want to go. Now we have seen this in the FS, where the captain is aware of the souls he or she has taken responsibility for.

The first passenger from the animal kingdom has taken flight. We had the first dog Mozhan. When she came out, she was looking at me in such a strange way, I could feel the soul of the dog. It was amazing. It was like a look of thankfulness for the experience.

We will have no limitation in expanding the knowledge. We have no fear of failure, because we have not failed, we have to understand. When I tell you, the people who came in the first time, and they could not feel, and they came this time, and they could feel. Because we adjusted the systems. We understood where there was a problem, it's not coincident.

Animals and infants will be able to tell you where it hurts through the soul, when they cannot speak the man's language. The only dumbness and deafness stays at the level of understanding of the man, not at the level of the STM.

This is what the new technology shall bring. This is what is about to come. This is what is happening now. Even the birds give the good news. We got to understand, that the enhancement technology is enhancement in plasmatic fields and is enhancement in understanding of the knowledge of the Creation. It's not a machine. It's understanding of the process of the Creation.

You will reach to the same position and time as us, (if you go back and try and to study and learn, all what we taught you from the beginning. Try to comprehend it, not just memorize it.)

(It took time to teach and share. We did not concentrate developing on just one thing. As we taught you we kept moving and changing and bringing all the bits together. We set the structure of teaching so that everything would come together in the end. That's what you see in the FEU in Linz. It was all developed together. It contains all the knowledge. It's the manifestation of all the teachings together as one. It's a totality of knowledge. You can learn it if you put your heart and soul and energy into it.)

It took 40 years to put the pieces of the jigsaw together. And this jigsaw is still wet, it hasn't dried yet. It needs a lot of adjusting and repainting. And that painting is in the knowledge of the man, for man to understand, and become the envy of the universe.

As I said, you were sitting on a donkey and looking at the UFOs, but now the people in UFOs are sitting on the donkey, and watching how did man take such a huge leap. He frog leaped from zero to hero. (He got the understanding of the knowledge of the Creator and the creation. That's all it is. There has been no other cause for it. Other then the love of Mitra and the Creator for planet earth.)

We will heal the damages man did to this planet in the coming weeks and months. We'll make this planet a place where the universe comes to see the love of the Creator for his children.

End of part 1 439 KSW Quick Index

Q: Is oxygen gas in the blood at that the field strength of the Soul of the Physicality (STP)?

K- Everything in the body has a soul of physicality, even the hemoglobin and the rest of it. It's not exclusive exclusivity of one atom, or one object, just because you think you see (something.)

R: Is the field strength of a cell related to the oxygen content?

K- Not really.

(But if you look at it as a matter state, then it does.)

(From the perspective of plasma, oxygen is at the level of the charges of the magnetic field strength. So, from this point the matter understanding does not have any meaning.)

R: But if the strength decreases, if for example, carbon monoxide replaces the oxygen, and we get carbon monoxide poisoning?

K- The way you talk is in the old science.

In the new science it's totally different. (In the present knowledge of man, you die from carbon monoxide poisoning. Where in the new science you don't die of it, because you understand that it is the energies of carbon monoxide, which crosses the lungs of the man, not chemicals. You can develop technologies very rapidly, that you just put a Gans Patch on the lungs and change the fields of what you call, carbon monoxide, into to a useful energy. That's all, and then you don't die of it.) You don't even need an oxygen mask.

(Don't mix and match the plasma science as it suits you. Like a camel bird, talking about it in the matter state and then just adding some words like plasma to it. Understand that matter state is also in plasma state, but at a lower field strength. Matter state has its own parameters of thought.)

With the new technology, nobody should ever die of carbon monoxide poisoning. Because it's not the element of carbon which enters your lungs. It's the energy of it, which blocks the field transfer of the energy of O into the blood.

It's a totally different ballgame, if you work purely in the plasma understanding of science. The carbon monoxide as a chemical doesn't go into the blood. It's energy transfers into blood.

(The characteristics of Carbon monoxide does not transmit energy, that the blood stream can pick up. So the energy is not reachable to the blood. It's like a dimmer switch on a light. It doesn't bring in enough energy, so the light stays dim. When you die of Carbon Monoxide poisoning, it's because you get starved of energy. You call it suffocation, but it's not really that. When you inhale the CO you block the energy transfer, which is in balance with your blood circulation, which takes in the energy from the environment you live in.)

If you jumped into the space from the Space Lab, how would you die? Would you die of suffocation from carbon monoxide? No, because there is no carbon monoxide. (So you come up with another excuse, you say you die from a lack of oxygen. You go from one concept to another, because you don't understand the totality of the knowledge of creation.)

You can train your lungs to take any energies from the Cosmos, from the environment, then you can walk in the space without a spacesuit. Because now you can take energies from the universe.

You have 2 circulations in the lungs, one brings deoxygenated blood, which is dark in color, and the other brings oxygenated blood, which is bright. Who changes the color? Why has the world of science never looked at the color change. It's the same blood. (It's the same with the dark spots on the sun, the returning energy has been used and causes the dark spots, which indicates less energy.)

We have to understand the technology. The guy who went blind from a stroke has been through the system about 6 times. He goes through the full flight system, because we're expanding the soul, and understanding of it, and he comes out. He has had massive headaches, because the soul wants to change and is repairing the damages of the stroke.

I'm sure if we would have spoken to Naomi when the brain was getting rebuilt, she would have told us that she also had massive headaches, because of massive changes. But she couldn't speak at that time.

Yesterday, he said, that for the first time he can see the color red. I explained to him why he sees a red color. I made a blind man to see color for the first time in six years in less than three weeks using a space technology of the plasma of his own soul.

Our knowledge is like a torch at the end of a dark road. It's you who has to enlighten yourself, find a way to that light. When you stand and a man says, he can see color after six years, through his own condition, his own work, then you understand the technology is so advanced in understanding the process of the Creation. This is not the first time we made the blind to see. Because the soul wants to see through the eye of the man.

We allow the soul to expand and that has brought the change in his condition. Every time he goes in the EU he tells us different stories, where he has been, what he has done, and what's going on.

(We have to understand the knowledge in its totality in both the plasma and matter state understandings, then when we transfer the knowledge from one to the other, we understand where the changes are and what they mean. In plasma state we talk about the Gans's and how the energies are carried throughout the body. There is nothing else.)

If you put the right Gans Patch on somebody with carbon monoxide poisoning, within milliseconds it's corrected. You call in the work of the STM. But the condition is, does the soul wants the physicality to stay, or has the soul decided, that this condition is what he has been looking for, to escape from the pains of this life. (Or maybe he has something else or somewhere else to go with this body.)

You cannot stop all the accidents and (deaths) just because you have the knowledge. You have no right to interfere with the work of the soul, in the dimension of physicality. We can collaborate with it. We can help to free it. You can bring all sorts of things to it, but you cannot dictate to it.

Somebody said, I wanted to go, but I couldn't. I said, because your soul wasn't ready. You wanted it, but he doesn't want it. Because you don't know what things are (being brought for you to experience. It needs more time.)

Because of all the tests we have done, all 3 Chairs for the P, STP and the STM will be combined into just a single Chair. This is the way it is in your physical life. You don't carry your physicality separate, from your STP, separate from your Soul. You carry yourself as a human, all 3 in one.

Now John in Arizona will receive only 1/3 of the units he ordered, because 3 has become 1.

You will see bigger changes after August and September. New systems will come in, new systems will play the game. This is the understanding.

What happens if you put somebody who's dying of carbon monoxide poisoning into one of these systems? Automatic instantaneous coming back to life. Everything we are used to, is going to change. You have not yet understood what juggernaut of knowledge has hit humanity. It's a super tank. A tank of knowledge of the universe

(The new Enhanced Energy systems to be used in electric cars will be set in 2 sections, just like our brain and heart work. While one half is working and delivering energy, the other half is recharging.) In that process, you'll get a continuous supply.

I'm sure car manufacturers like Tesla will divide their systems into 2 halves very soon, with this technology. That when one half is delivering, the other half is getting charged. The difference between the two units next to each other, will create that extraction of the fields from the universe.

We don't call it a free standing unit, because it's the knowledge of the universe. It's the energy of the universe, it cannot stand free, it stands within the fields of the universe, and extracts the energy.

We've seen the MaGrav Units been used on Tesla cars, and other hybrid cars with a lot of efficiency changes or whatever.

(The man's dream of "free energy" is, in a way, premature, because the man doesn't have the knowledge, of how to jump the loop.)

Very soon the number of Universal Council members will double in number. The floor is opened for those who are devoted to serve humanity through the languages, to join the Universal Council.

(If somebody has been in the FEU that speaks Chinese, then if we ask you to go to China, you will speak Chinese, without you ever knowing the language. To you, you are speaking in your mother language, but to the listener through the dimension of the Soul, he hears you in Chinese. This is why we call you to come into the FEU as fast as you can, to imprint the Soul of the Physicality of the Man.)

(Hassan Hallal helped to save the life of an Iranian diplomat who caught the Corona in Africa. One of the unsung heroes among KS who are committed to the knowledge. When we ask KS for help they usually respond without hesitation. When you responded you already made a connection to us. Unlike in physicality, it doesn't matter who makes the call, you or us, the connection is already established.)

R: Okay, thank you for that somewhat cryptic answer.

K- It's not cryptic, it's the reality. KS know when I need help for the Foundation, I don't hesitate. I pick up the phone and I just call. If we need help we call, because it's the way we set up the souls, that they are there for when the call comes. We give it freely, and we've seen especially in time of need for anything, Knowledge Seekers don't even think, the answer is instantaneously, yes.

Mr. Keshe taught about treating war wounds with Gans's especially in Ukraine from shrapnel, and missiles and burns. Find out what components the shrapnel carries, if it is phosphorus, sulphur, or nitrogen and make a Gans of it and keep as much amino acid (AA) of it as you can. Combine with CO₂ and Zn and their AA. You'll see rapid change in wounds with no scars.

(Plasma burns are extremely painful, can take the skin off, but returns to normal in 24 hours. Plasma burns do not bleed, no matter how they look. Mr. Keshe has been burnt with plasma many times. Special way to treat with Gans's. KS have not yet reached that level of Gans production to get these kind of burns.)

The ethics of treating people in military hospitals. Example of treating ex-Prime Minister Sharon of Israel, for coma. The answer from Iran was, he used to be a diplomat, now he's a man, it's your responsibility to look after him.

I passed this message on to Mossad and Israeli embassy in Brussels that, we have instructions by the Iranian leadership, that Mr. Sharon used to be the prime minister, and one of the biggest enemies of Iran at that time. It's a pleasure to be able to help him with the new technology.

This is the way it should be, that once you're injured, in a military hospital, you do not carry rank. According to the instructions of his eminence Ayatollah K of Iran you are treated as a human, as a soul. And this is the way it shall stay. Hopefully, when they come out they'll walk away from (the life of violence.)

(Mr. Keshe has been following the effects of participating in war, on the American military personnel, for over the past 20 to 30 years. The majority of the soldiers who come back with different mental conditions and different things, the majority but not all of them, have committed the crime of killing.)

It is the punishment of the STM to the man who has taken another life. All of the psychosomatic conditions and other things are the result of the balancing of the soul's energy. (The truth is that the taking of a life, kills the STM. It limits the strength of the expansion, you call it, the illness. It's like you shoot yourself in the foot, and then are expected to run a marathon. Imagine running a marathon after shooting yourself in the foot. That is the suffering you brought upon yourself by killing. With this knowledge, man will not touch a gun, because he knows that he is actually shooting himself, and he brings his own suffering upon himself for it.)

I was actually shocked when I got that message from the Iranian Embassy in Brussels, (about helping Sharon).

Helping someone in a time of pain and weakness is an obligation. It's not a condition of choice?

(Romanians understand French, Italian, English, Spanish and Portuguese, because they do not dub the foreign movies in Romania. They watch the mouth moving and read the subtitles. Then they quickly learn the language. Ella was able to understand Portuguese in Brazil on their visit for the Foundation, because she watched the movies as child. It's important to understand the emotion of the language.)

FEU can repair the memory of the Soul.

Dean interviews people after they come out of flight system. Dean is not allowed into the system.

See light of your own Soul - "I am you" - enlightenment

A lot of people coming out of the system speak about seeing the light inside themselves. In a way, they recognize their own soul. During their travels, something says to them, "I am you, I am your soul in front of you." And it's very funny when they speak to you, because they see their own soul speaking to them.

A couple of ladies were in that position, where something says, "I am your soul, I am you." They receive enlightenment, and it touches them. The beautiful thing about it is, they see the beauty of themselves, and some of them change.

I am in communication with some of the KS who have been through the system, (and I see how their life changes. It's hard to see your own changes, but if you come with a partner, they can see and feel the changes in you. The change usually brings less fighting and arguing, and it's more pleasant to be around each other, there is more harmony.)

Yesterday, one woman said, "I have a new partner." So it touches them, and it touches the soul. It elevates the soul. We see it when they come out, their eyes are different, the emotions are different.

(When you go into the system, you go into a different structure of mind. A lot of people talk about a different dimension, but it's not that, it's still the same life. Now, what is inside you, comes outside and you can enjoy both. That's the only way I can describe it. It's the first time you have collaborated and openly worked with your soul. This is what a lot of you don't understand.)

Up to now it was something imaginary, (you only heard from the priest telling you that somewhere was a soul, and it goes to heaven or hell, or whatever. But now it's the first time in these machines, that you and your soul work together. The soul listens to what the physicality tells it, and then it does it. It takes it where it wants to go. That's all it is.)

This is what we promised from the beginning, to "free that bird from the cage." (Now that bird goes everywhere and brings you back messages, but this time you are with it. You actually rely on your soul to take you to the outer dimensions of the universe. It's beautiful to see, and if you understand it, it's not just a talk, it actually happens.) It's the first time the STM and the physicality are working together.

(Up to now you traveled in your dreams and the soul was inside. Now the soul is outside, and he tells the physicality what to do, because the soul takes the physicality where it wants to go. The soul is a plasma, I just sit there and let him take me. This is the difference, and that's why with the body of the man you fly. But with STM you go to places.)

(Humanity for the first time has learned to openly collaborate between the STM and Physicality of the Man, in the environment we created. We did this so that the man can have the freedom and the pleasure of doing it. This is the beauty of it.)

(Because now you have the understanding, you don't need to wait to dream. If you want to see your mom, you instantly go see your mom, you do it through the STM. He knows where she is. And if I don't see your mom, it means she's busy, or she doesn't want to see you. It's like in a real life when you call Mom. She might not be at home, or has gone out. So you have to wait till the next time.)

(It can happen that partially the soul is too scared to move out and do something, go somewhere. Maybe the person feels, that if I let my soul go, "oh, what's going to happen? I can't get it back." Yesterday we had a guy who was crying, and crying, and crying from Chair 1 to Chair 3, and then louder in the system.) We took him out, and I asked him what happened. He said, "I wanted to fly, but I couldn't fly. So I was so angry with myself, because I couldn't fly." This is where he went wrong. The Physicality is still trying to control the Soul.

(It's the first time in the life of the man, a system allows you to expand your soul and to free your soul, but at the same time it's still that bird in the cage.) Most of the time, we are the cage, and the soul is the bird. Now, the soul is the cage and we are the bird inside. The way we've been kind to our soul, the soul is kind to us. We work together. And this is the whole purpose of the technology.

(Do you want to go to New York spending 10 to 12 hours on a physical plane, and 12 hours in airports, and everything else. Or you let the soul out, and it takes you to New York. When you get there you let the soul back inside, and change clothes. That's all it is. In the very new near future, many of you will do this, because now you have learned it. People are learning it after coming back 4 or 5 times, then they will show you how it is done.)

I am a very patient man. I can wait a few more weeks for the first KS to go through transmutation. It's not that long, I waited for thousands of years. For the first time, we let you work with something, that you engaged and denied yourself for millions of years. It's not only the man, but even the passengers of the U.

Q: Will there be a time when this soul will be able to be in more than one location at the same time?

K- In a way, yes. It can be.

(It will be interesting when we get the first people who are diagnosed with what you call, schizophrenic, and what I call, "beautiful people" to come into the system. Let's see how the two individual souls will take shape in it. Would the all different souls participate, or just one.)

(This system will throw a new spanner in the workings of medicine and psychology. How will they react when the mothers come in with diagnosed schizophrenic children, and then have to sit and watch while 2 or 3 characters come out and play together. It's inevitable, it will happen sooner or later.)

(I have been telling you this for years, and then you'll see the individuals who have been trapped in one physicality. It'll be really interesting how they'll shine and show themselves when they come out. Will all three become independent speakers of what they went through? Or just the one who always talked in the physical dimension. But now we can talk to them inside the system, and then outside it, and see if they match.)

(A wonderful time has come forward for humanity. Now we can see and realize what we have done to our own children, putting them in mental hospitals and institutions, and giving them injections for decades. All this because they never understood the truth about the creation. It's one of my deepest, deepest wishes to have the first "Beautiful People," come into the system. I worked on it for nearly 30 years, to prove, and bring respect to these people, and not shame, and show what we've done to them. We have castrated them.)

END 439 KSW Quick Index

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:18).

K- As Rick said, we have some good news. The news is as good as one can understand it, and one can apply it. As we saw in the intro, where we're talking about the scientist of the past, what they did, what they could imagine, what they thought is possible, how we added a knowledge of the man to the point of the centuries, to get to the point where we are today. We talk with the Space Technology and the rest.

As I've said before, and last night in the 11-11 interview (means Rick's show), in a world of mankind, if you travel in places like in (where) people still travel on the back of a donkey. Man was that donkey, sitting on the donkey and moving, and a fast car passes. To the man on the donkey, this is something of a dream. That's what he might achieve in the future, if he does something or whatever. Otherwise it's just a dream. (:20). We brought that knowledge.

Then now, the man became again with the present knowledge on the back of the same donkey. Because with all the technological development we have, we look into UFOs, and others they have, and they're still on the back of this "donkey" of ?? the engine, and burning something.

With the new T, which we have taught you, now the Universal Community (UC) in the level understanding of UFOs, are those on the back of the donkey. Seeing mankind traveling with the speed, with the knowledge, that they dreamt about.

The difference between the teaching of the Keshe Foundation in past years and present time, is that the dream of the man to move from that donkey to that advanced technology so that he could go. (He) has achieved (it). We have realized it. We have delivered it. We have tested it. It's not theory anymore.

Now the UC looks at mankind, (as) those with such advanced T. What was the grace of God, that He they did not teach us this? When you see up to now UFOs in the sky, you marvel, how much do they know. How come we are so behind? Now these U Communities in UFOs, marvels how did mankind, did such a huge leap in understanding of technology. Where they marvel, they will come to humanity to learn, to take the next step, to become what mankind knows today.

In the process of the teaching, we have taught you a lot of things in stages and in steps, and a lot of things has come for you to see other things, and understand. You take according to what you understand, no more, no less. (:22).

We have opened the Linz what we call, flight simulation. This is a flight simulation of the Soul of the Man (STM), the mechanism, the technology, which was hidden within the man, now manifests itself. The beauty with the new technology is, that you don't fly anymore, you go to places, you decide instantaneously. And we have tested this extensively in past few weeks in Linz. We have now 70 - 80 people going through the process. It's giving us a very rough guide, where we are, and how we are.

When we come back, where we are off, for the next week, and the week after. We'll start to attend the transmutation of the human from one unit to another. We succeed or not, is not important.

What has happened is understanding a knowledge. What is important is finding, and seeing, and comprehending what has happened. As I explained yesterday, to our top man in Keshe Foundation is, we bring you in as a man, you go through the system, system 1, or unit 2, and unit 3 (Chairs 1-3), and then you go into the flight system. In unit 1 we allow the physical balance of the energy of the cell of the man. In Unit 2, we bring collective cells in operation to be unified. Then you feel as a human being, some sort of the feelings of energies.

In Unit Three, we extend this to the whole, what we call, physicality (P) of the man to become embedded in the STM. (:24). And then when you move into the Unit (main flight systems), you are in a condition of the soul, if you manage to go through this.

Now, as we have two Units in the same room, we don't need to carry this what I call, 100 kilogram of weight (human body). I only need to transfer the energy fields.

It's very much like as I said before, when you have an envelope, doesn't matter if you put a check in it, letter in it, dust in it, because it's irrelevant. Where the physicality of the man sits within this package. Now the envelope is the energy of the STM.

So this is why it looks so amazing to you, as how is it possible. M fields packages of plasma have no weight. They don't carry mass, they carry fields interactions, and if you can match the G field dot point, you can always move, instantaneously. We have done this in those examinations of the people who are with us, they come in the system.

Sometimes I move in the system, I don't talk anything in the room, I just watch. And I see how this group of people, six or eight of them will behave. And next time to the next group, I go in and I ask them, would you like to take a flight. Some of them straightaway say, no. But don't forget they are in this condition, and they hear the voice of the man. (:26). Because now the body is just like when you are in a room and somebody shouts from outside, you can still hear the voice, you can react to it, but you're not outside to do something about it, because you're cocooned by the room.

In trials, we have explained to people, we want you to go and see somebody. In the past week, we tested this very clearly. That go and see somebody you like, somebody you love. We had yesterday, two beautiful Knowledge Seekers from France with us, husband and wife. It was extremely interesting to listen to two of them. When we asked, that go and see somebody you love, both husband and wife, they went to the parents. They saw the parents who died a long time ago. They felt them, they touched them. They felt the presence of the grandparents. And they asked them, "would you like to come back?"

Now we travel with the space of the knowledge, with the control of us. So what I said before, is that before you go into the system, or the into the state of what we call, transmutation of the elements of the body of the man, in the dimension (D) of the Soul, which is Totality of the energy. Then you don't need to wait one day to dream about the mother and father. You can go every night to sleep with the mother and father, feel the love, feel the tension. The sons are away, the children away from you, you feel the souls, you feel, you touch.

Yesterday, we had an experience with somebody who came the first time, he said, "I feel nothing, the system doesn't work." We're not here just because the system ?? works. We have to understand why, we haven't managed to cover you. He came back yesterday, after two weeks, three weeks. He went in the machine, (:28). he came out. We had five people who could not have any emotion the first trip. Yesterday, together, all of them in one room.

The ones who had time to go through the process through their soul, came out totally different. They were here two weeks ago, three weeks ago, the fresh ones had a problem. So it means the souls had to be adjusted, they needed to understand what is going on. I may invite them to come back again, to come and do it. The interesting thing was, all the three who went in the second time, after two or three weeks, they came out with interesting, interesting conditions.

One of them went to his house, he moved his flower pot, or whatever in his garden, and he said, when I go home, I want to know if I moved it. First time (he came) it was nothing, he was just sitting in the room. It means the Soul of the Man has to be educated, that the time is not when you leave, everything is finished. When you leave the room, the life, the true life through the D of the soul starts.

We had the other two will same kind of experience. So we confirmed. We can confirm, that we can reach, it can be done, and we have to find out the process. So in this process, you have become the traveler of space by the wish, not by the dream. We ask people to fly, instantaneously they do.

In a way, when we bring you to the room, maybe 100 of you, and we say, now we would like to see how many of you can go to New York, we meet in New York for a party. All of you who came go to New York to a party, will end up in New York. How many of you came to go to Venezuela, or to go to Teheran. We tell you the passengers of Tehran, be ready to move. You'll move to Tehran, instantaneously. And the systems which are built in Tehran to receive you, (:30). we'll change it.

Interesting enough, in the recording we received from our team in Iran, the Iranian broadcasting has put the four new technologies, which Americans are so much after by Iran. The first one is the Keshe Foundation technology. We can let you play the recording which we received. Which means Iran has taken a position as a leading scientific space program.

But even the new present knowledge in Iran is obsolete compared to what the Keshe Foundation today is offering in Linz. In the coming weeks now, as I said, our team and even people who came the first day, now saw the system, they said, the whole thing has changed. Because we are upgrading, we are changing, we are understanding where it needs to be adjusted.

Hopefully after 12th or 13th of July, we are ready to fly humanity in a matter of what we call, the Soul. These are experiments for us, we don't know. We cannot confirm in one way. But now we set our systems in the direction of the plasmatic fields.

Release new Plasma enhanced System - reduce power consumption

In doing so, and in the past few weeks, I have received many requests from the Knowledge Seekers (KS) around the world, "Mr. Keshe, we cannot afford the fuel, we cannot afford the energy cost, which has gone up by folds and folds. We cannot survive. Can you release the energy systems that saves us a lot of energy, saves us a lot of money. Keshe Foundation responds back the same. The new generators of the Keshe Foundation what we call, "Plasma Enhanced Systems" will be released in July to the world population.

We are doing tests without our team knowing from each other, in different parts of the world. (:32). The first 25 what we call, Enhanced Plasma Systems to 50, will be

delivered out of the Iran factory. We set it out. It's not anymore a MaGrav it's actually what we call, it's a system. It's a box system. It has systems in it, which allows you to enhance the what we call, energy in your environment. Which means can reduce the fuel costs by extending the use of the battery in hybrid system, it increases the use of the electric motors, if you do let's say, 1,000 kilometers on one charge. Now you can do two, three, or 4000 kilometers on one charge.

These have not become what we call, free standing generators, because we don't see a need for that at this moment. But you can use them. In a way what we see. What used to be about 1 euro fuel, now it's 120, and it's draining the family resources. We are putting back in what you might pay, because when the prices go up this way, stays up for a long time, and the same with the energy costs. Governments are trying to make a lot of assumptions, and tax relief, to take the pressure off.

Keshe Foundation releases 3,000 of these units, from next two, three weeks, till July. We have brought in the Arizona (AZ) manufacturing back into operation, but in Mexico. John has done the stock take of what he had before, and the new system will be added to it. And Tehran and Austria will go into production within the next few days to meet the demand of the new Enhanced Plasma Energy Systems.

We have done before, when we went out for generators around about 2,000 euros. (:34). The new system is offered at 5,000 euro and it will stand as a first set of discounts, at 4,000 Euro. We guaranteed delivery first out of our factories before end of July. We will deliver prior to end of July, but we would like to keep everything safe. Keshe Foundation Store has opened up its links for you to place orders to get it.

What we would like to understand and to know from all of you, is that, you report back to us, this is a trial system. How, what you see, how much more (savings), how much extension (of electricity) you have had (from the systems.). The new enhancement energy generators for the home is very interesting. You work with the energy of the house during the daytime, which is nothing, but your system backs up with for the nighttime.

These systems at the moment are between 1 and 2 kilowatt we can support, maybe 3 kilowatts. And then in the coming time, if we achieve what we target to do in the development, by next 12 months, and we achieve a free standing unit, we replace those who bought these, to upgrade, to what we call, the new freestanding unit.

Which means, now, we are responding back to you (to your call for help). The other reason for the release of this development is, because if you came in to the Enhancement Units, you always saw two MaGrav units hanging around the system. These systems now have been changed to the Universal System. And now we change the energy production plasma to the same.

We are not selling you any MaGrav units. We are selling you a technology as a package, which enhances the energy use. Which means, let's say if you are spending, let's say three kilowatts a day on line, if you have two kilowatts, will be done by the system. (:36).

The system will be improved. We responded fast to this. I developed this technology sometimes ago. I gave you the MaGrav system, you did not understand what to do with it. Now Keshe Foundation has completed the cycle.

We have a specific reason why we don't claim a generator or whatever. This is because we are developing a new plasma Technology enhancing the energy production. In the coming days you will hear why we do this, because Keshe Foundation is one way or another ?? international organization system, that we will be part of, and it'll be done.

So what you asked us to help, to back in, Keshe Foundation has responded. Go to the Store, place your order, we guarantee delivery by order. We release orders. If we receive a thousands orders this week, whoever comes first, (is) delivered. We can deliver between 50 to maybe 100 a week, starting August, September. But initially we do 25 to 30 a week till we get everything in order, and our what we call, material backing is in order.

Keshe Foundation Austria goes back into production of these systems in conjunction with what we have as the Test Center, which is now building the systems for flight.

The whole process is, we try to achieve zero demand, Free Standing Energy System for cars, and for home. In a way the target is set. I gave you seven years. I told Jalal and his team, they are doing beautiful work in the background.

We will deliver what we call, free wireless energy transportation in a very short time. These systems free what we call, energy transportation, is getting tested as you go into the reactor center, into the test flight center. (:38). It's not something that (we) remind you in the future. It's already has gone through the test. We have seen the performance. We know what's happening to it.

And in a way, what we see. What is in the patents about 15 years ago, 17 years ago when we released them, we spoke about wireless energy transfer in the home. We see a need for you in maybe next 12 months, to take all your electric equipments in the house, out of the circuit in the house, and adjusted with a Unit which Keshe Foundation will develop and give to you. To adjust, to just attach it to, actually at a point at the end of the wire where you used to plug it in.

You think and the light comes on - thought controlled electricity

To receive energy, run your fridge, your freezers, run your electric lights by demand. You think the light comes on. This is what you are doing in the Enhancement Units when you come in. When I tell you, go and see your mother, your thought clicks on. You come into the room, you think you want the light on, and how dim you want it, you'll get it.

This is not something will happen, it's already applied, tested, it works in the Enhancement Center (EC) in Linz. Now we're commercializing it, but it has been in the patent from the original date some 15 - 17 years. So you asked us to release, confirm the

MaGrav technology works. It has worked in the Space Center, now it works in your homes.

Once we complete the development to a free standing, any of the first 3,000 Units, which we released today, will be replaced with a free standing one, freely by the foundation.

But now use this technology if you got a hybrid car. Use this technology if you got an electric car. Use this technology if you have at home, if you want to plug in. (:40). It's not as good easy as you had it with a MaGrav. This is a system, it's not a MaGrav box. It has electrical, electronic systems in it, which controls a process, adjusting the field. The only thing, which you have to purchase when you receive it, is a large car battery that you keep it as a support. That we cannot supply, because it ?? moves ?? in different nationality's, different what you call it, countries. We don't want to get involved in moving, what you call, acids and different kinds of things and batteries with us.

KF Health Centers in Italy and Uruguay

So, the whole structure is, you asked us to release you the energy system in this harsh time. Keshe Foundation has responded. The other thing is that many of you asked us, where can we get health support with the technology of Keshe Foundation. We have entered and we have reached agreement with two groups, one in South America and one in Rome, Italy. The agreements reached late yesterday, is going to be done. Any diseases which Keshe Foundation announces. You can book on the website of Keshe Foundation for the health centers run by the doctors in Rome, for given what we call, conditions.

We don't enter medical application. We are the providers of the technology. We are supporting Knowledge Seekers teams of doctors around the world now, to set up the centers. It's the initial stage. From next week or the week after, you can go to Rome for specific diseases. You can book in, the way you booked in the Flight Center. It will be announced by us. You can go on the website of Keshe Foundation, or on the Wellness Center in Rome and book yourself in. Fibromyalgia, CVS, Alzheimer's, (:42). autism, herpes, and others will be added to it step by step.

Hundred percent guarantee or refund - high costs

If you suffer from Fibromyalgia. The fees of the Keshe Foundation, wellness centers in collaboration with doctors in South America, in Central America, and in Rome will be very high. But there is one thing written in our contract, with our teams of doctors, is one thing. If you do not deliver full recovery, you are refunded. Which means, we guarantee to our doctors using the technology, the process on the technology, by the doctors applied, sits directly in line with, for eradication of a condition, not just temporarily. When they sign you in for Fibromyalgia, for CVS, for Alzheimer's they give you a guarantee of 100% recovery. That's their job. We are technology providers. Keshe Foundation has a certificate from naturopathic organization of Belgium to provide such a technology. It's our right on the license we have.

This is what in the court of Belgium was not disclosed. Defrauding by a nation. In this process with deliver CE certified technologies and machinery, to centers. In December the 15th the first center in Uruguay will open up. And from there, we expand into Brazil, Mexico, and the rest. All our centers, which we collaborate, will carry what we call, a call center. You call in you have a problem. (:44). Every time the patients are monitored 24 hours a day.

We are not here just to sell technology. We are here to guarantee the health of the future of mankind. In next few days, you can go on the website of the Keshe Foundation and book yourself, the way you booked for Linz, into the health center, Wellness Center of Rome with the expert doctors, that they will carry the process and they guarantee 100% recovery, as doctors.

We are providers of the technology and we don't get involved in medical applications. As I said, the team I had a long meeting with them at night last night. They came the day before to us we know the team for some times from Italy, and agreements have been reached. We complete within the next few days, and from next week or the week after we see how the doctors will handle. We advertise heavily through the Keshe Foundation structure worldwide, that these things can be done. And we give 100% assurances for recovery, from Keshe Foundation technology used by the wellness centers around the world.

Keshe Foundation Wellness Center in Rome will have two locations, and handled by expert doctors in the fields, which they accept. They'll be trained by the Keshe Foundation in use of the system. And you will see the most advanced technology systems. If you've been to the center, you've seen the what we call, these units. Now, you will see the application of these units in your wellness centers. We bring the new advanced technology in line with what is there.

So we have confirmed and conformed with what we set out to do. (:46). The energy systems Enhancement Unit, and the wellness centers around the world. The beauty with Italy is, it's near to us, we can control it for the first three to six months, that once we deliver the technologies into Arizona and the other places, we know exactly what we have, what we got to do. It's not for us to talk to somebody in distance, they are a few minutes away from us, an hour flight we can get in there and come back and see the whole structure set properly, in the next 2 to 3 months. The way we've done in the Linz Center, we polish it, and we deliver one of the most advanced centers of the world, what we call, health in using the technology of Keshe Foundation.

I thank the Italian team of doctors who have taken this step as the research center, and the Wellness Center in collaboration with the Keshe Foundation. You will see the sign of the Keshe Foundation at the entrance of these health centers around the world, assurance guarantee for what is set to be delivered.

In the coming months, we add more and more conditions into the work of the health centers, which are our collaborators. We don't take you up as we provide the service. We

are here to book for the people who deliver the service, and everything will be fully monitored by the Keshe Foundation and operation of these companies.

We have brought one of the most intelligent women I know, in understanding the work of the health organizations around the world. She will accept, she has accepted, she already runs an organization like this. We bring in her expertise to make it worldwide as a health center in collaboration with the public, with the people. We thank her for coming to the Center, for seeing what we do, and immediately she brought the people, (:48). who are responsible for the development of the Center in South America. Everything is done, we are just waiting for them to finish the building, that we can deliver. Italy is already finished it's operational, we just add the Keshe Foundation technology and systems into it directly. We'll promote it heavily around the world, that from now on what we said, it's delivered by the doctors, we are providers of the services in the background and developing new technologies to be there.

We are scientific organization we don't want to get involved in delivering of the technology. We will do the same with agriculture. We do the same with energy in a very short time. Once the first 3,000 units are delivered, we see how everything is perfectly done, what we need to adjust, if there is any adjustment, then we go into what we call, licensing big manufacturers to manufacture these for Keshe Foundation under license. For us to develop the next steps, for us to bring a new dimension into everything which we do.

As I promised, you got your what I call, Energy Enhancement Units you've been asking me for years. MaGravs don't work. MaGravs will work or not. The new system of the plasma technology using the same understanding will deliver. We have tested yesterday in one of our research labs. Other labs are doing other tests for us, that you will see how clean production of energy can be.

I asked to Keshe Foundation team in the background to switch on the screen for the sale of the new EU for energy, for automotive, and for house use, and we deliver directly within next 30 days. (:50). Leaving our factories according to the order. If the order is above our production, we inform you, your delivery will be due in this week, or this time, within that time. Those of you who placed the order will see it. You'll get it within 7 - 10 days, you'll get the response, your order has been positioned for delivery in such a week.

We set up the production lines for this purpose, now it's there. Because I could give another, find somebody to do. The production line in Tehran is set, is working, the production line in Austria is set, is working. We have the facilities and materials in Arizona, which will be shipped to Mexico to deliver. We'll deliver 3,000 units by Christmas. We tell you how and where.

This is a trial system, we want feedback from you, how much efficiency, what you have reduced in fuel costs, what you reduced in the electric bill. To come back to us, to see what we can do, how better we can improve this enhancement energy units.

We are not selling your MaGrav system. We're not selling, promoting a free standing (power generator). These are enhancement energy (units), and we want to know how much we can enhance the production of energy, that allows you to reduce from your bills.

What we calculated is within next 6 to 8 months, if you understand how to work with it, you can use one system from the car and put it back in the house, and use both ways. Because the system while you're traveling has already set up for the house use while you're away. So in a way, you can cut costs from both ends. (:52).

Everything can be done, our team we have a beautiful team of experts who will do, will deliver this. You will see the next step on a stage of the development for the Keshe Foundation. The what we call the expansion in the science in past three weeks, four weeks in Linz has taken a different shape.

In the next maybe three weeks to six weeks, we deliver transmutation of the element Unit for sale. Most probably our team will be able to complete it, if not it will take a little bit longer, because they have to understand what the whole system is. As we can transmute from one unit to another. Now we should be able to transmute materials. Transportation of the elements from factory to the house direct does not need Alibaba. You do not need to buy Amazon and pay a future cost to it.

We see in the next 12 months to two years, the factory directly in China or in South America will deliver to you in London or in Tehran instantaneously. The end of the postage and packaging is on the horizon. We see the next step will create huge amount of jobs around the world, by the development of this technology. Once they see the working of it.

We allow scientific world to join us, to bring this into a rapid conclusion. The Linz Center is the cornerstone of the new space technology for man, through the STM, through the energy transformation. Join us we're getting a lot of people wanting to come and see and do things.

We are not a health center do not come to us, I have cancer, or I have this. We do not want to know, because it's not our job. The health centers are set up for them. If you come in and you go through a process and you find recovery, that is an addition, it's a gift into the space travel.

Your soul wants you not to suffer - not our technology

As I said, (:54). your soul wants you not to suffer, not our technology. If you suffer from a condition, and you go through the system, and you come out, and that condition has gone. It's not our system, that is we created the environment. It's you and your soul, which has decided, enough of suffering.

We had a lady with us with asthma pump yesterday. I said, you can't take it with you in the room. She came out she says I can breathe different. I said, let us know if you ever

use asthma pump again. It's the soul, which wants the change. We have people with different conditions come in, with all sorts of conditions, and they come out and say, it's gone. It's your soul which does the repair not us. We are not a health ?? work. We are a space agency traveling.

I thank the Keshe Foundation of Iran, Keshe, The Iranian government for the first time has allowed independent space company to be set up in Iran and be registered. Keshe Space company has now been set and established in Iran. For the first time, a private space organization, with the permission of the Iranian government has been allowed to operate in Iran. We'll extend this to the space travels, and we extend this to bring more technologies out of you.

I have given one undertaking, a surety that we will collaborate with the nation of Israel, not state on Israel. We collaborate with American as a nation, not as a state, as long as it is warmongering.

Iran will take the next step, and reaches out of the hand of friendship across, special offer with the new technology. (:56). You got to understand by delivering the new enhancement energy systems, the structure of the whole oil industry in Persian Gulf will change within the next two years. We take lead as a nation of Iran to deliver, that no one, no nation suffers. The standard of living has to stay the same, and life has to be carried on.

You will see what is about to be delivered in the energy space plasma, will take a new shape. You went into the systems and you've seen the reactors around the system, setting up when you go into systems. All these will be changed into a total plasma condition, that you have no matter state, in the what we call, enhancement centers.

The progress in technology cannot be stopped anymore, because it's not in the head of the man, it's in the machinery, which works, and delivers. Transportation and transmutation (T&T) within the next few years will become obsolete the way we do it today.

What I see, the use of the nuclear reactors, nuclear technology as energy, as a cornerstone for the next step of the man endeavor, to be able to travel the depth of the Unicose, not the Universe (U). There are reasons for it, and we explain, as the science of man matures.

No way there can be nuclear war

All the time I've been asked, are we on the verge of nuclear war? There is no way there can be one, because no nation would go, crazy to do this. It doesn't matter what stage you stand on.

Make all nuclear reactors safe - plasma dome to contain it

The fear of it will be taken away, (:58). as we deliver systems as we did in Fukoshima, now in a more advanced way to contain all nuclear reactors at their site. Nuclear technology is safe, once you can dome it, not by concrete but by magnetic fields, which

can absorb it, the way we have shown it in Fukushima. Keshe Foundation in the coming weeks will deliver this technology to every nuclear power stations on this planet. We become nucleus safe technology, what we call, organizations. We deliver what we call, "the dome of peace," the dome of non-nuclear.

What does this mean? If you're running a nuclear power station, with all its facilities, we provide you a field dome. The fear of explosion by nuclear reactors will become absolute zero percent. The failure we have seen in 3 Mile Island, the failure we have seen in Chernobyl, the failure we've seen in Fukushima will happen, it is inevitable to happen. But this time with the technology, which a Keshe Foundation will deliver to nuclear centers as a nuclear technology, delivered by Keshe Foundation, we create a dome of safety.

So, every nation can have its nuclear technology, as they want. Keshe Foundation will support with Iranian nuclear industry, the support for the dome. I deliver this technology through the Iranian nuclear center. And we become not the one to be afraid of, (but) the one you need to guarantee, you need the nuclear power in your centers to be safe.

As I said, do not play with Keshe Foundation, because the technologies we have, now they are delivered. You encourage your nations to open the nuclear centers, (1:00). nuclear reactors, but you ask for the safety assurance, that the Keshe Foundation from the time of commissioning and loading, has guaranteed the safety of the power station. This nuclear power technology safety, will come out of Iran nuclear center in Natanz.

If you do not know where Natanz is, as I've seen many of you have looked at, and Azar posted it everywhere, to share it. It's just about a few kilometers away (from Tehran). We will protect the Natanz center with the new defense plasma technology, that no one can reach. The same we'll do with other nuclear power stations around the world.

The cost of the system to be delivered, has put as 100 million euro, delivered by the Keshe Foundation, compared to 300, or sorry, 30 billion cost of a power station to guarantee its safety, that no nuclear radiation leaves the premises. For 100 million is nothing. We deliver technology.

I developed this technology over 25 years ago, and during my student time, because I could see radiation leak from Queen Mary College nuclear reactors, right in the center of London, in my land. I could not accept it. I set out to develop a technology, that the reactor could be there before it was decommissioned. But now the technology, with what we have is there. We give a guarantee, and then on taking and testing by all the nuclear centers. We invite IAEA to come to Iran to test it themselves.

This brings a lot of safety to Iran nuclear technology, where the threat by the other nations to bomb the Iranian centers, (1:02). becomes obsolete. I gave the space technology to Iran exactly 14 years ago. For its celebration we give back another technology to Iran, that IAEA requests Iran to deliver the fuel, and the new plasma technologies for doming all nuclear power stations. You cannot operate, if you do not

receive certification, a guarantee from what we call, the Iranian nuclear centers backed by the Keshe Foundation technology.

What we do, is what we have shown. Now you understand why it was important to open the Linz Center to do a lot of testing, to understand the process and to see how we can bring new technologies, that is at the reach of every single one (of you).

5plus1 talks should resume soon

I'll be traveling to Iran, once the negotiations are complete. We have a feeling, that the Vienna talk will resume in a very short time, and Americans have stepped down from some of their demands in the past few days. And we will see the resumption of the peace talks and completion of it in the coming weeks.

This allows us to release the new dome of peace around the nuclear power stations around the world. It depends on the decision of the Iranian government how we deliver this to every nation. It will be part of we, as I said to Iranian leaders, I never negotiate from a point of weakness. I negotiate from the point of strength. It's been my habit for years from my childhood. My father always told me, you're the toughest negotiator, even for your expenses for your pocket. I've never even, I don't have that with your mother.

What we'll do from Iran, (1:04). we don't negotiate to take sanctions off. We negotiate for you, if you want the guarantee, that none of your nuclear reactors will explode. None of your nuclear silos will go broke. You need to sign the contract with the Iranian nuclear centers. I am a Nuclear physicist. I am an Iranian nuclear physicist, proud to be part of the human race, but forcing the technology to bring peace.

As I said, I gave you, as Rick said, I have many good news. You received your Enhancement Power Unit, you received the ?? wellness and health centers in Italy. Now, you have received the gift of safety for every nuclear reactor operating on this planet. The dome, which we have created in Fukushima, without them knowing, now officially comes into work.

We have to understand how the process of Creation is, then we can deliver a system for it. This is what we've done in the past few weeks. I waited a long time to deliver the Enhancement Unit center in Linz. It wasn't a dream. It was time to wait till the humanity gets to a position, that have a need for it. Otherwise, it's another thing.

You are in literally, position of, no food, and no energy, if Ukraine situation carries on. Most of the western world will suffer with shortage of energy. We've seen that shortage of energy in Iran, and in other world, parts of the world. One day shortage one day cut. The day they cut you, you have no electricity, you put your enhancement energy Unit to cover it. You have no worries, (1:06). you support your nation. You support the backing of it, and then you're ??? When you don't need it, using your power unit. You will let your nation not waste money on buying fuels, which is doesn't need it. We don't put pressure on the grid. We don't put pressure on the nation resources.

We've seen people who've been through the system. We had the Italians yesterday. We have others which have gone through the system. Many of them speak about, they don't want to eat, they feel no hunger. We had a guy yesterday saying, in one system I was ?? not hungry, that I don't even want to eat. I just came out, I just want a glass of water.

In our system, in our flight system, we have foreseen feeding process of what we call, physical damage of the system itself. System itself, repairing. In the system, we have facilitated for food. You are not aware of it when you come in, but we actually feed you. In a system, there is what we call, a wellness factor. That's why you come in, and you say you have this and that, and now - no. We allowed for you to be healed through your soul, not us, we are not involved in it.

In the same system, we have a flight system. And we have a flight system to do with the physical dimension (D), a we have a flight system to do with the D of the soul. Those of you who have been in the past two or three weeks, and you come back into two or three weeks, some people are rebooking to come in. We had one yesterday, he wanted to test again. You will see the changes in the system. We are setting the system for flight, controlled flight, pre-testing flight.

And you will understand that as I said, (1:08). that when you travel with the Keshe Foundation, everything else is looked after by us. We have built it within the structure of the system. It's not coincidental. Many of you will not feel hunger, because you will have learned to tap into the energy of the soul to feed yourself. This is the reason for it. You are feeding yourself. You'll find out you might lose some weight, because energies you were eating for, is not needed.

The technology has become a cornerstone of the change. And we are still not even in the crawling stage of understanding this technology. We just are witnessing its progress. When the man understands it, starts moving with it, start crawling with it, and imagine what it does when ?? ?? , and when he goes for the high jump.

The process of the technology delivery is rapid, from now on we don't hold back. From now on, we don't stand back for you Knowledge Seekers to test the MaGravs, and come up with everything. The enhancement power units, which are delivered now will give you assurances for a lot of things, which you have worried with.

In the coming time, we'll add a system to the new what we call, Enhanced Energy Units, which you buy, a unit which feeds you. The collaboration between the two (units) will stop man to kill. In a way when you buy the first Enhancement Unit for energy, you have preset yourself for the second part as a feeding station. What we showed you here, now will be delivered to you in your homes here.

In the coming time, on the fourth of July, you will hear announcement about the Keshe Foundation joining one of the world's leading projects. In that process, we'll provide these two systems, that nobody in this structure, which will be announced in Fourth of July,

will ever need to bring food within the D of the system. Where we will provide in the coming time what we call, Enhancement Wellness Center. Which means in this city, there are no supermarkets. In this city there are no hospitals. This is not a dream, because many of you, some 70 - 80 of you have already been in it.

Have felt, have brought the changes, and once you leave this room, you're still connected to this room. It's a plasma and above the strength ?? the other, each one of you, coming and going are connecting to the same center.

As I said, (1:12). understanding the fundamental process of the creation has brought man to be a leading scientific what I call, race by a leap, that man never could not have ever imagined. We have delivered what we promised. We have delivered what we came here for, and we will deliver the totality in understanding the process of the creation, step by step. Step by step we'll do.

I'll read you something that just came in from the Linz center. This is a gentleman who came in for a second time yesterday. It's just a small report sent to me by our team in Linz center. He says, he has reported, he forgot to tell us, but it on his testimonial. It says the gentleman who was here for a second time yesterday, told me that he forgot to tell us, that he has lost 4 kilograms from the first time using the flight unit, he is less hungry after the first use. He is happy, as he had too much weight anyway. And he is constantly connects himself (with the system) when he is at home.

Once you leave, this is what we call, Testimonials, from the people who have been in it. Once you've been in it, you're connected to it, you become a man of peace. And the stage for the dome of peace has been set in Linz. Where Linz was the stage for the first large scale destruction of the human race. (1:14). Now the phoenix, from the ashes has risen. And this gentleman is Austrian.

The beauty of the technology is, I wonder how many of you will walk into the shopping centers, and how many of you will go to supermarkets, or maybe (there will be) just pictures on the shelves, (showing) that man used to have these things. The beginning has started, and we see from the Testimonials from other things. And we had a Stefania from us, Universal Council for Italy, being with her sister, here sister telling her, "you have changed, you've become much younger. So you gain age time too.

Try to understand the new technology. I have taught you everything, it's you who has to expand the knowledge. As we are doing. It's you who has to understand the principle behind the knowledge. We do not want to teach you, as you've seen it, this time, that you copycat and do all sorts of things with it. We tell you what we achieved, we deliver what we achieve. People are testing it and coming to test it. So it's your time to understand what we understood, and it's your time to catch up.

Everything, if you listen to collective of the knowledge we shared the past years, it's in this room. Nothing, there is no magic, there is nothing hidden. If you even look at the simplicity of it, when I spoke with you a few minutes ago, (1:16). that if you've been in

the Enhancement Units, as I told you, you have two MaGrav systems. You use these MaGrav systems for your power. We use these MaGrav systems to create field energy, and we use another to another part. So now you understand the whole of the room is dynamic.

People who stay in the center of the two systems, they talk about very powerful energies. Yes, because in a way, you're here, and the two systems are here, you're on a crossroads. Of course, you will get a full combination of what we call fields trap.

We have tested flight systems by captains, as I said, explain to our Italian team, the captain always sees everyone. When we ask the appointed Captain when they come out, they always tell you a woman or man, that we have people, or they see the people who they have taken the responsibility of their soul. But the people (passengers) are not aware of, that they are traveling with the ... captain.

Interesting thing is, if you go back to part of the teaching, from a long time ago, I'm sure you can dig it out. I said to you, that in the flight system you trust your soul with a captain, and that Captain will deliver you everywhere. Now we have seen this. The captain is aware of the souls he's taken or she's taken responsibility for. In so many ways, (1:18). it becomes irrelevant on what we take, and what we do, as what we see is responsibility of the captain for everything.

First animal Mozhan - Dog space traveler

What is interesting. We had this week, our most beautiful what I call, first passenger from the animal kingdom. The gentleman carried him in, or her, he talks about feeling the dog changes in breathing. The first animal Mozhan has taken shape, flight. We have other people are coming with other animals. And we'll see how this take shapes. We want to know how the animals behave afterwards.

As I said yesterday, when the first person, or when the first creature went to the space, was a dog. Now we have the first Mozhan dog. He is such a cute animal, so tiny. And he is so light. When he came out in the bag the second time. The first time he was carried, she was carried in by the owner at the head level, that she could go through the whole process of the what we call, plasma condition. The second time when she came in yesterday, she was in a bag, and when she came out, and they put the bag down. She was looking at me in such a strange way, I could feel the soul of the dog. It was amazing. It was like a thankful for the experience, the way the man speaks in their own language.

We will have no limitation in expanding the knowledge. (1:20). We have no fear of failure, because we have not failed, we have to understand. When I tell you, the people who came in the first time, and they could not feel, and they came this time, they could feel. Because we adjusted the systems. We understood where there was a problem, it's not coincident.

So, we will be able, you will be able to hold your dog in your arm, and know what is wrong. When he hurts, he will not tell you by word, but the way you felt the soul of your mom, your dad, and you spoke with them, and they tell you they want to come back. Your dog will tell you where he hurts. When you hold your child in infancy, and she's crying from pain, and say I don't know where it hurts.

When you hold it at the level of the Soul, you know exactly where it hurts. The changes are fundamental. When you have a deaf and dumb child or a person, you don't need to wait for the sign language, you connect to the soul, "I want water", thank you very much for helping me and the rest of it. The only dumbness and deafness stays at the level of understanding of the man, not at the level of the STM.

This is what the new technology shall bring. This is what is about to come. This is what is happening now. Even the birds give the good news. We got to understand, that the enhancement technology is enhancement in plasmatic fields and is enhancement in understanding of the knowledge of the Creation. It's not a machine. It's understanding of the process of the Creation. (1:22).

Try and go back to all what we taught from the beginning, and you will reach to the same position and time as us. Everything which I have taught, everything you see in the EC, everything you see in the enhancement, what we call wellness centers, everything you see in the enhancement energy systems, is what has been in the patent from the beginning of the time, when we wrote the patents in 2005.

It took to teach, it took to share, we did not concentrate developing one thing, we set the structure, that everything with it, that comes through it, is developed together as you see it in the EU, in the Linz. The energy, the food, the health, the wellness, the transportation, the transmutation, everything is in one machine. It's like making the pieces of a jigsaw and now putting them together. It took 40 years to put the pieces of the jigsaw together. And this jigsaw is still wet, it hasn't dried yet. It needs a lot of adjusting and repainting. And that painting in the knowledge of the man, for man to understand, and become the envy of the universe.

As I said, you were sitting on a donkey and looking at UFOs, but now the people in UFOs are sitting on the donkey, watching how did man leap, frog leap, from zero to hero. Understanding the knowledge of the Creator, (1:24). and the creation. And that's it. There has been no other reason for it, except for love of Mitra, and the Creator for planet earth.

We will heal the damages of man to this planet in the coming weeks and months. We'll make this planet a place where the universe comes to see the love of the Creator for his children.

Thank you very much for today. And we'll go for a short break and when we come back, we'll answer any questions ..

Proofed to here >>

<<< BREAK >>> 439 KSW June 30 , 2022 (1:32).

K- We enter and we see what comes up? ... I have given you good news today, and what is about to come? There's much more to happen. But the dream of energy systems, and health centers, was something which the Knowledge Seekers wanted for a long time, now has become a reality, and with that bring different changes into the whole work of the KF.

Ever cell in body has STP - even hemoglobin

Q: ... Is gas, oxygen gas in the blood, is that the fields strength of the Soul of the Physicality (STP)?

K- Everything in the body has a soul of physicality, even the hemoglobin and the rest of it. It's not exclusive exclusivity of one atom, or one object, just because you think you see.

R: May I rephrase it to say, is the fields strength of a cell related to the oxygen content?

K- Not really. (1:34). If you look at it as a matter state you do. But we know the oxygen whatever in the body of the man, is the level of the charges of the magnetic field strength. So, this does not have any meaning if you look at it.

R: But wouldn't it be, if the strength decreases say, when we get carbon monoxide and it replaces the oxygen for example, we get carbon monoxide poisoning.

K- The way you talk is in the old science. The way we talk about carbon monoxide in a new science is totally different. Why do you die at the present knowledge from carbon monoxide? If you now understand that it is the energies of the what do you call, carbon monoxide, which crosses the lung of the man, then you can develop technologies very rapidly, that you just put on the body and you change the fields of the, what do you call, carbon monoxide to a useful energy. And that's it, you don't die of it.

You don't need an oxygen mask, you don't need something else. When you work with the new technology, you got to work with the new T. You can't be as I always say, like it camel bird, look at the half of the science in the matter state and what you've been taught about materials, and then the other half, try to fix it in the plasma state of understanding.

With new T nobody should die of Carbon Monoxide poisoning

With the new technology, nobody should die of carbon monoxide (poisoning). Because now we understand, it's not the carbon which enters your lungs. It's the energy of it, (1:36). which blocks the field transfer into the blood, or field transfer in the lung to deliver the oxygen, to the energy level to the blood.

This is a totally different ballgame, if you work purely in a plasma science of understanding of the plasma working, or matter working. Because you never understood when a carbon monoxide enters the lungs, it doesn't go into the blood, it's energy transfers into blood.

Why that energy is not reachable to the blood? Always said, it's like the dimmer on the light you have at home. If you don't bring the energy enough, the light stays dim. If you increase energy, the light turns on and it shines and you determine how bright you want the light.

Carbon monoxide due to his characteristics does not transmit the energy, which the blood stream can pick up. So it starves off that energy and you die because of it. You call it suffocation. It's not, it's actually. What is the purpose of the lung? You don't die of suffocation. You inhale and you block the energy transfer, which is in balance with your blood circulation, which is with the energy from the what do you call, environment you live in.

How would you die in the deep space, when you jump into the space from, what do you call it, from the Space Lab? (1:38). Do you die of suffocation from carbon monoxide? No, there is no carbon monoxide. But now you say you die, because of the lack of oxygen. You find another excuse for not understanding the totality of the knowledge.

If you train your lung in the space to take any energies from Cosmos, from environment, you can walk in the space. You don't need a spacesuit, because now you take energies of the universe. You talk about carbon monoxide, but has nothing to do with it. You take your energy, which is not in line with the combination of oxygen energy levels in the hemoglobin, in the blood.

Because you say you have 2 circulations, one bringing the un-oxygenated blood, and one oxygenated blood. One is bright color, and one is a dark color. Who changes the color? Why the world of science has never looked at it. Hello, it's the same blood. Who is there to change its color?

But if you understand the light from the Sun, you see the darker spots on it, because it absorbs the energy from it. It means what is coming back is the energies which is used. It's not enough to brighten the energy, that brightens the lights more.

We have to understand the technology. As I explained to you, we have a guy who's coming frequently onto the space center flight system, because he's blind. We've seen him now for the 5th or 6th time. (1:40). He has a condition of the blindness, for six years because of a stroke. He has been in the first two weeks, this is his third week coming in this week. He goes through the full flight system, because we're expanding the soul, and understanding of it, and he comes out.

He came on Monday, he said, I have two days I was flat on the floor with a massive headache in my head .. I said that's good news. He looked at me and he said, what do you mean? I said, you're taking a flight, your life, your soul wants to change. He is repairing it, you're not doing anything. So for him to see the damages of the stroke has to be repaired. And when you repair damages.

I'm sure if we would have spoken to Naomi when the brain was getting built, she would have told us, (she had) massive headaches, massive changes. But she couldn't speak at that time. But this gentleman can do. So the brain ..

Interesting enough, when he came out of the system yesterday, we just asked him what do you see. He said, for the first time he can see red color. I explained to him why he sees a red color. I made a blind man to see color for the first time in six years in less than three weeks using a space technology of the plasma of his own soul.

Our knowledge is like a torch at the end of a dark road. It's you who has to enlighten yourself, find a way to that light. When you stand and a man says, he can see color after six years, though his own condition, his own work, then you understand the technology is so advanced in understanding the process of the Creation. (1:42). And this is not the first time we made the blind to see. Because the soul wants to see through the eye of the man.

But for him to see, it's not a pickup job, all the damages in the background has to be done. The soul is doing all its repairs in the background. He gets a headache of it, because sorry you plugged the wrong plug in the wrong place, the fuse blown up, now we have to repair. Let's see how this goes.

How would he develop to full sight by his soul. We allow the soul to expand and that has brought the condition. Every time he goes in the EU he tells us different stories, where he has been, what he has done, and what's going on.

We have to understand the knowledge in its totality in one or the other, or when we transfer knowledge from one to the other, understand where the changes, where the information sits. We talk about oxygenated blood, or monoxide, but we don't want to talk about the Gans's and energies, which carry as an energy in the body of the man. There is nothing else.

You Knowledge Seekers can produce a (Gans) Pad, anybody goes in a carbon monoxide condition, just put a Pad on the chest, and within milliseconds it's done. You call in the work of the STM, if you haven't understood it. But there's a condition, (1:44). does the

soul wants the physicality to stay, or does the soul decides, that's the condition I was looking for to escape from the pains of this life. Or I have another appointment for this body, I want to take him somewhere else.

You cannot stop all the accidents and ?? ends, just because you have the knowledge. You have no right to interfere with the work of the soul, in the dimension of physicality. We can collaborate with it. We can help it to free it. You can bring all sorts of things to it, but you cannot dictate to it.

Somebody said to me, I wanted to go but I couldn't. I said, because your soul wasn't ready. You wanted it, but he doesn't want. Because you don't know what things are going to bring for you, if you see some time for it to do it. That's what we saw, with the people who came into the system last week, two weeks ago, and yesterday.

3 Chairs have become 1 - like human all 3 are 1

Then if you understand this, then you understand the STM, STP of the man, and the physicality (P) of the man, then you understand it's very easy. Next sessions when you come to Linz, because now you are used to what we call, going through Seat 1, Seat 2, and Seat 3, and then go to the (flight) system. Through the tests now, we know what we are doing, you will find out there'll be no Seat number 1, 2, and 3. All three has been brought into one, as is, in your physical life. You don't carry your physicality separate, your STP separate, your Soul separate, you carry yourself as a human.

The new system when you come in next time, if you've been before, you only sit in one chair, and then you go into the system. You can go to another chair and see what's the difference between this chair, and traveling for your system. But there is no need for Chair 1 (to 3). We had to test that everything we do is correct. Now the 3 has become 1.

This is what I tell you that advancement in technology is for us to understand, that we can do the job correctly. I said to a John few days ago, John you bought so many for Arizona, you're going to get the 1/3. He said, why? I said, now it's three - one.

It's the development in the technology. This is what will go into Rome wellness center. This is what will go to South America Wellness Centers. We're not just putting you just to see. It's for you to. It's for us. It's an enhancement center for simulation, you're simulating the system, you get to where you want. We get to, our team to understand how to put it together the correct way. You will see bigger changes after August, September. New systems will come in, new systems will play the game. This is the understanding.

What happens if you put somebody who's dying of carbon monoxide into one of these systems. (1:48). What would be the response be? Automatic instantaneous coming back to life. When I explained to you, everything we are used to is going to change, you have not understood what juggernaut of knowledge has hit humanity yet. It's a super tank. A tank of knowledge of the universe

Any other question?

Principle of 2 systems like brain and heart - one charges while one delivers energy

Q: ... from the plasma School Library of Australia. With the new car unit will it go where the car goes to be able to charge along the way. In Australia we have vast distances to cover and not good coverage of charging stations.

K- The process should be you will understand. The ultimate goal for the cars will be 2 sections. We do that in our brain. We do that in our heart. The systems have to have two systems, that (when) one while it's delivering, the other one is recharging, from the one which is delivering. It's a very big difference. (1:50). In that process, you'll get a continuous supply.

I'm sure car manufacturers like Tesla will divide their system in 2 halves very soon, with this technology. That when one half is delivering, the other one, the other half is getting charged. And the difference between the two units next to each other, will create that extraction of the fields from the universe.

The systems you will get works this way. We can go into the unlimited resources. We don't call it a free standing, because it's a knowledge of the universe. It's energy of the universe, it cannot stand free, it stands within the fields of the universe, extraction.

We'll release the delivery of the first units by end of July. And we'll tell you how many per week we'll deliver, how it's going to be done? What is the monitoring. What is the effect. What we see with what we call, plasma units. We've seen the MaGrav Units been used on Tesla cars, and other hybrid cars with a lot of efficiency changes or whatever.

Now you don't have to worry about what do you call it, "how long will it take." You will need to bring in a combination. It's the same as what we've done, two systems in the Enhancement Unit. Two more new enhancement vision systems, and simulation systems are coming into the center in the next couple of months. It's the same principle.

Free energy is premature

The dream of the man, (1:52). to have a free energy is in a way, premature, because a man doesn't have the knowledge, ?? when he wants to jump the loop. And how we do it. It will be very interesting how we'll take it, and how we understand it.

Any other question

New Members of Universal Councils will double in numbers

K- Can I say something before you start. Something I just forgotten, it's important. The new list of members of the Universal Council for languages will be released in next few days. And the Universal Council will be added by, more or less it doubles in numbers,

active members. I welcome all the new Universal Council members to the Council. We hope we find a rapid development within the work of them and the Keshe Foundation.

At the same time the number of Universal Council Support for languages has increased. There's a lot of work in the background getting done. For to bring them into line and the floor is opened for those who are devoted to serve humanity through the language to join the Universal Council. It's your responsibility to what I call, (1:54). bring your language into understanding of it.

I was explaining to one of Knowledge Seekers yesterday, in the EU, that very soon once we tell you, the way we tell you to go and dream, or to go and see your mother, or father, or fly and, or go to somewhere. When you .. are in your Enhancement Units, because now we tried this one, without anybody realizing what we do, we'll ask you to speak Chinese. And if there has been in our system, somebody who's been Chinese, you'll speak Chinese, without you ever knowing it. To you, you speak your mother language, but to the listener through the dimension of the Soul, you speak Chinese to them. This is why we call you to come in as fast as you can.

Now we have the Farsi language. We had a beautiful doctor with us from Iran yesterday. We had Kawos with us yesterday and today. He had the whole run of the system on his own today. We have the Italians, the French, the Romanians, the people from Bulgaria, and we just adding on the languages. So do not be surprised, that in the coming time when the system is ready, when we ask you to go to Romania and your English, and you go to Romania and you speak Romanian and understand all the emotion of it.

Then you understand the purpose of Universal Council, and then you understand why it's been set up this way. We had yesterday the pleasure of our Knowledge Seekers from France, and now if you come in, and we decide for you to speak French, you will go to French, what we call, part of the speaking world, (1:56). and you will be speaking French like the French do. It'll be interesting.

I wonder how many of you will go through and speak Portuguese, as they already have been through the system. Without ever been to Portugal, you understand when you turn the television on, it doesn't matter what the language is, German, French, or Portuguese, because you've been through the system you understand exactly what they say. You feel the emotion, but you never knew Portuguese.

This is the responsibility of UC members, that 's why we asked you to get to the system as fast as you can, to imprint the Soul of the, what we call, the physicality of the Man. This time now, we have received 2 Universal Council members 1 known, and 1 unknown, through the system, and we will see how they'll carry this D of the soul through the .. spoken language. Carry on.

Q: .. Hassan says, he always answers my question before you ask Rick. So, perhaps you've already answered, but in any case, Hassan says, you said on 2202 2022, that you are the bridge between the Universal Council, and Universal Council support. I may add

us, and the Universal Community. (1:58). So, when we see you at the soul level during our sleep time, is it you contacting us, or us contacting you?

K- Which Hassan is this one? Is it Hassan from Africa or Hassan in US?

R: Hassan Hallal

K- Hallal, in beautiful country of Gambia. When you do that, it could be both.

If you don't mind disclosing Hassan. He is an extremely active giant guy, as a council member, or U Council member. When we had the Corona crisis, Hassan moved country, to save the life of an ambassador. These are not unsung heroes, these are the Knowledge Seekers, which are committed to the knowledge. He moved, he delivered Gans's to the pilots to be delivered to a man he doesn't know. An Iranian ambassador was trapped with his son, with Corona, on a critical condition. He easily could say no. We had the same from Paul from Togo. Pilots carried the Gans's in the cockpit. This is the devotion to service.

So we came to you when we needed, in a physical dimension. You have established a link, it's you calling on us, it's the same. (2:00).

A lot of Knowledge Seekers in the background through what they believe, and what they do, do a lot of strange things for the Foundation, for the soul, for the humanity. I was, the only way I could save the life of an ambassador, Iranian ambassador in a strange land in Africa, was to get Gans's to him. With just one call, nothing else, Hassan was on the move, to make sure. He does what he could do best.

We saved the life of the ambassador, thanks both to Paul and Hassan. Materials arrived within hours from each other, from two different parts of Africa and both carried by the pilots, to save a man's life they didn't know. A high ranking diplomat.

This is when you established a call, you don't need to make a call, and say we need a help. We are aware of it, and we do the job. You don't need to make a connection, if you call, or I call. Souls do their jobs, as they need to do in the dimension physicality. I thank you for both, for such a rapid response to a dire situation in central ?? ?? Africa. Now a boy of 14 has a father and a man has a son, and Iran still has an ambassador. (2:02). We answered to call of Iranian Foreign Office to move, to save the life of high ranking diplomat in transit, it was confirmed Corona, and he could not go back or forward.

Now you and decide if you call us, or we call you. We called you when we needed you in D of P, so we have established a line of communication. And by the way, I like to tattoo on your shoulders. It's a strange place to put a tattoo, but it's amazing how you've done it.

Any other question.

R: Okay, thank you for that somewhat cryptic answer.

K- It's not cryptic, it's the reality. KS know when I need help for the Foundation, I don't hesitate. I pick a (phone) up and I just call. I don't what I call it English, "pussyfoot

around." If we need help we call, because it's the way we set up the souls, that they are there for when the call comes. We give it freely, and we've seen especially in time of need for anything, Knowledge Seekers don't even think, the answer is instantaneously, yes.

What's the other question? (2:04).

Q: .. It says I've heard that plasmas solves wounds and burns in a short time. If you can, please send me some treatment sheets, or give me a suggestion from which materials to extract the information.

K- Can you repeat that?

R; He's heard that plasma cures or solves wounds and burns in a short time. So he'd like to have some kind of paperwork, that describes the treatment, and from what materials to extract that information, or some other suggestions, where to get that information?

K- It's all over the Internet a lot of KS have done that.

Q: . He goes on this. He goes on to say that a colleague from Ukraine wants to provide trauma centers with effective solutions for treating wounds and burns. That's the objective here apparently.

Plasma Gans treatment of military wounds and burns

K- We've done tests with Ghanaian military in trying to do the wounds. I know Chinese military has done a lot of tests using Keshe Foundation technology for military wounds. When we talk about Ukraine, it's a military wound, it's shrapnel wounds, it's all sorts of missiles, bits, and bobs and heat. It's different than the normal wound. (2:06).

The way to do it is very simple. Most of the shrapnel wounds carry components of phosphor or sulphur, and some of them carry components of nitrogen. One of the best way to handle it is to make the Gans's of it. And then in conjunction with the Gans's connect it to CO₂ and Zn, and in all the processes collect the what we call, the amino acids, (AA). A mixture of the amino acids of all the elements, plus the CO₂ and Zn, will create a field condition for withdrawing the effect of the shrapnel's, or components within the bullet wound, or what we call, armaments, anything with military.

When you withdraw that, it becomes a normal wound, to process itself, and Zn and CO₂ with their amino acid. One in a way kills the pain, takes the neural information away, and one allows the neural system to be grown, while there is no communication on the, what do you call, the pain side. You will see a rapid change. Actually, when you do it with the AA, you'll see no scars. They'll talk about they had a wound so big, but you don't see anything. People think you're crazy you talk about nonsense. (2:08).

But this is what it does. It will not, most of the time it does not leave any scars. So if you were in the Ukraine situation is now, understand they need it, and this is why we release the information this way. These are mainly weapon, what we call, application of the weapon technology. And this is the only way to do it.

Plasma Burn extremely painful - disappear after 24 hours

Some of you, which should move into advanced plasma Technology in upcoming time will report plasma burns. Plasma burns are very different burns than any kind of burn you have ever known. And it's extremely excruciating, painful. It lasts a very short time. You can get a half of the skin of your finger out, and next day is as nothing happened. The skin goes back to normality.

I used to get this quite a lot years ago when I was experimenting and I used to shout, and they would say, "you burned yourself again with plasma." Yes, it happens. It's different than a burn with water, burn with fire. Your skin comes off and next day, it's as nothing happened.

Those plasma burns needs a process, a special process for it to heal. I over burning myself, when I used to make a lot of flight systems and ?? abandon systems, it used to happen. I used to get the plasma the wrong way, and used to escape. When the plasma escapes it's like a bullet, it just goes through you. (2:10).

But it's because your skin your body is made of Gans's, it deforms a lot of things. You just see a piece of your skin hanging. And the next day is not. What happened? The skin was not there yesterday, it was all off, and (today) it's back on again. Even when the skin comes off, it builds itself very rapidly, within 24 hours. I have experienced this one hundreds of times.

Once you as Knowledge Seekers, have not advanced to that level of plasma production. But plasma burns will become another part. It's very similar to the bullet, what do you call it, armaments damage.

The strange thing is most of the plasma wounds don't bleed. You have no blood coming out. The skin is open, you see your flesh, but there's no blood. You can't use a tissue to collect blood. If you burn yourself, the skin comes off and bleeds. Plasma wounds creates no blood. I've never seen a single drop, but I've seen half of the skin off my finger disappear, or hanging. It just takes 24 hours or so, and it's gone, as there was nothing there.

If I had these in a matter states, burning my fingers, you should have seen a lot of different colors ?? skin ?? When you shake hands with me, you see me, the fingers are all the same. This is part of new space development technology, which we have to understand.

Use these kind of things for situation in Ukraine, as you said, where they want to help. This is the only way you can help. Find out the shrapnel, find out what was in the shrapnel. (2:12). Make a Gans of it, and use it back, the same for the CO2 and Zn, with their amino acid, and you will see very rapid, rapid, result.

R: Mr. Keshe, I was wondering about what are the ethics regarding, say, military hospitals. In this case that are, you know, patching up people that are wounded in battle? And that kind of thing? Does that intrude on the World Peace Treaty? Or is that the correct conduct to be doing in that situation?

K- I have a very good memory from his eminence Ayatollah K of Iran. I've said that before. When we saw the first coma patient in Belgium. About the same time the Israeli ex-Prime Minister Sharon was in coma. If you remember, he was a huge man. I met with the Iranian Ambassador in Brussels, and I put a request to the Iranian leadership through the Iranian ambassador, that "Mr. Sharon is in coma and we have the technology to help, to bring him out of coma."

The message was sent through Iranian Ambassador foreign office to his eminence A K of Iran. The reply was very swift, it came back very short. (2:14). The answer from Iran was, he used to be a diplomat, now he's a man, it's your responsibility to look after him. I passed a message on to Mossad and Israeli embassy in Brussels that, we do not. We have instruction by the Iranian leadership, that Mr. Sharon used to be the prime minister, and one of the biggest enemies of Iran at that time. It's a pleasure to be able to help him with the new technology.

Out of nowhere, the girl which we helped with the coma case in Belgium. I received the call that they wanted me to attend in Liege Medical University section for a helmet, which was built by the Israelis, and by developed programs by ?? Ghent's university, to be tested in Liege, and they wanted me to be present. What we found out later on, that this system developed by the Israeli securities, to check that, if it's used on the person's head, which we use our technology, is correct. It brings back consciousness, awareness and everything else. Which it all came positive. And .. a short time later, if you read the press, Mr. Sharon was moved to private home, to start this process. (2:16).

This is the way it should be, that once you're injured, in a military hospital, you do not carry rank. According to the instructions of his eminence A K of Iran you are treated as a human, as a soul. And this is the way it shall stay. Hopefully, when they come out, they receiving technology in their D of the physicality and the soul, they'll walk away from this position. This is what we have to learn, and this is why we have to understand. Ranking in the hospital doesn't exist. When you're an injured person, it doesn't matter if you're a military, or normal hospital. It's you who has to change your position when you move out. Do you still want to be. And still you learn another lesson.

I always said, a very interesting point if you understand it. We see people to go to war. Especially I followed this one with the American military soldiers going back to Middle East and different wars, and coming back, in past 20 - 30 years. Majority of the soldiers who come back with different mental conditions and different things, majority not all of them, have committed the crime of killing.

We see many soldiers go and come back, and we see nothing with them. They say, they shot at something, or something. But majority of what we see, (2:18). is the punishment

of the STM to the man who has taken the life. Then all the psychosomatic, other parts of it, is the result of the balancing of the soul's energy. I followed this very closely in past 20 years, especially soldiers who have been going to Iraq, to ?? Syria, and they've been to Afghanistan, and the rest of it.

The truth about the life, taking a life, kills the STM. ?? the strength of the expansion, you call it, the illness. Then we'll see if you'd like, as I've always said, shoot yourself in the foot and do a marathon of life. Then you, lost a leg by yourself.

Man will not touch a gun, not usually out of the fear of what has happened to him, but knowing that it will happen to him. There is no fear. So being in a position of military, and serving, and whatever. Once you're in the hospital, you're a man. I learned a lot from, when I received. I was actually shocked when I got that message from the Iranian Embassy in Brussels.

At the same time, we saw another coma case, which was the prince of Holland, in London after an accident. I asked the king of Belgium in the meeting we had with them. Can you pass a message on to the Dutch royal family, that we can help with the Prince. Some of you Knowledge Seekers from Holland were with us, you did a lot of work trying to establish that line. (2:20). Where the Queen did not want the help for the child. It was very shocking to me. It was very like the woman who didn't want to see (she refused help to end her blindness). When I was told that the Queen has refused to accept anything. She doesn't want the son to be, the condition he is. This is the affairs of the family and Monarch.

But we've seen this, when you're in a state of illness, it's the responsibility of the physicians to bring you out of that condition. Doesn't matter what it is. It's for them to decide in the future, how the change the life, being military or civilian.

It's very interesting, if you listen to most of the wars in the past, especially ones coming out of the Ukraine, a lot of Ukrainian military soldiers. When it comes to the last point, they change to civilian clothing, and they try to get out as a civilian, they don't want to be in that uniform. But would they, if they managed to get through, will come back and put the uniform on, or they learn from it, they learn what it means, they could be in the corner, and walk away from the military.

Helping someone in a time of pain and weakness it's an obligation. It's not a condition of choice?

Q: Why do Romanians understand French, Italian, English, Spanish and Portuguese? (2:22). But the others find it difficult to understand Romanian. What fields do we have at the base?

K- There is the same thing with Dutch, and with some Germans, and some other languages. You see similarity into it. And you understand it, and sometimes don't understand it. But then you know you understood it. I know what you're talking about,

because I know a lot of Romanians watch a lot of un-transcribed (not dubbed with subtitles) television programs in Romanian. In Germany, France, everything is dubbed. The guy moves his mouth but speaks French. The same movie you watched in Germany moved the mouth, but speaks German.

In Romania, they don't do that. They get used to listening to it. So you listen to the Spanish, Portuguese programs which are very common in Romania, and they have subtitles. So people naturally pick up the language. That's one of the main reasons, especially the young generation.

But it's very interesting what you say, because I had to stand this yesterday. I lived in Italy for six years, never learned a single more or less, word of Italian, because everybody around us spoke English. In past two weeks, we had an invasion of Italians in the center. Most of them don't speak any English. They say, "yes, no, " and then when you say, thank you very much, they say, "no, no." .. And then when say something somebody says, ?? not, (2:24) .. and something that's going to be no they say yes. So you don't know what you are talking with Italians, it's normal.

So I have to stand with the Italian translator, try to understand what they went through in the system. You know, I go in and out of the system continuously, because I have to change things. I was standing there listening to Italian, I understood everything. I said, you don't need to translate you don't need to translate. I could understand all Italians. But when I lived in Italy I didn't understand a single word. It was a beautiful experience yesterday with the Italians, maybe because Stephanie wasn't there, but translation was so, not needed. It was like I knew, I understood everything. There was more or less a couple of words, which I couldn't understand. But I didn't need a translator. I wonder what will happen when the next one's come in .

I noticed the same thing with the Germans because the Germans are speak some of them English enough to be able to explain the emotion, the emotion of technology, it gets lost in translation. So I don't speak any German. But now I realized, I know a lot of German, I understand the emotion, what they talk about and the words.

It's very interesting, I want to know what happened with the next group of people, the French, or the Spanish, or the others will come in. What they bring with them. But what you say, I had experience with it yesterday. And it's a beautiful pleasure knowing I never knew Italian, but I understand every single word of it. There wasn't a need for translation. (2:26).

Is it because I go into this environment with all the Italians, they have the party, they bring the bottle of wine, you get the full emotion of it. Italians are the only ones, who have up to now, laid down on the floor, and they sleep on the floor. Italians they come with the wines and everything else. And this is something I experienced yesterday, and the day before with the ... with the Italians who were with us . And I see the same with Germans.

I'm the worst person to learn languages, but I understand them now, like a second language. But beauty of it is when I was listening to the Italians yesterday, when I became aware of it, I wanted to know if I can get the emotion of the language, emotion of what they're trying to explain to translate. I could feel the emotion of it, it was fantastic. I will never. Maybe when I go in and decide to speak Italian in the room, unless the ?? speak Italian, I don't know. But this very, very interesting. How we will change languages. ..

Regarding Romanian, I know this, because nations which do not .. dub their movies, even in the origin language with the subtitles. Then people who love to watch it. They listen to it, but they read it and they get fed up reading it. They try to see if what they're reading matches to the words. Next time they don't read it. They have that habit. Romanians never changed Portuguese, Spanish, and some French and a lot of them.

I had this experience with Ella, head of the Keshe Foundation. When she joined us in 2 excursions to Brazil. She said, she doesn't need to, she never studied, but she understands, she can speak it (2:28). because in childhood, she watched a lot of movies Spanish, and Portuguese on the television with subtitles. That's how she came to know. When I speak to a lot of nations who do not dub their language, movies. You see that in the new generation.

Because they pick up their own channels is all traditional other movies, they get fed up, they go to the new movies, to the other languages, and reading a subtitle and their voice. It just matches up, and they learn languages. And that's why it is with the Romanians. Or at least this is what I see, and what they've observed, because we had this experience in Brazil, last year or two years ago.

Any other question?

FEU can repair the memory of the Soul

Q: .. Can the capsule, he calls it a capsule, I think he means the flight enhancement spaceship unit. Can the capsule repair the memory of the soul?

K- Yes. I tested this last week, and yes. But you have to. The lady who came out of the system was interested, or was touched deeply by the emotion of the warmth, of the hug, of the childhood time, of the mother. (2:30). It was amazing to watch it, and the way she was touched emotionally, could feel it. That even though she's in her 60s now, she had that instance of the love, she felt so pure from the mother, must have ingrained in the soul. She didn't feel the mother, she felt, she didn't touch the mother, she felt the mother as an energy. She knew this is the mother. And (it's) the only thing she was interested in. She was talking to us such an emotion about the warmth and the cuddle of the mother when she was a child. So yes, it can be done.

It's amazing what you can tap in. Gradually, in the test room, we are testing a lot of things, and we wait till they come out, when we get, and how we get, and how the

physicality of the Man gives information to the Soul of the Man, do this, and the soul does that.

We talk in a language for the soul .. to hear, because now when you go through the Enhancement Unit, and we see they do. They remember when they come out everything. The beauty of it is, Chair number 1 we know is the correction of the physical side.

When they go to number 2, and number 3, you move into the expansion of the soul. They always say they get bigger, all of them, 90%. It just grows. They see themselves growing, but it's not them. It's energy around them. When we talk to them, like, would you like to go somewhere? Would you like to fly, would you like to go to pass time. (2:32). We don't talk because souls cannot hear it. The physicality inside hears it, transfers it to the soul, and the soul goes. This is the beauty of what we see.

It's an amazing experience. It's not just standing, seeing what people tell you after they come out. The emotion and the way they've done it, and you know what you've done. And you know what you've seen.

We had 5 people, 4 people in the system yesterday, we tried to concentrate the energy of them, it was impossible. It was just a ping pong ball of people who didn't know where they wanted to go. I came out of the system and said, this is not going to be very good. Two or 3 people here just don't know where they're going. They're taking and giving from the system. The system just fluctuates. We see it. (It's like what) we've seen 2 weeks ago, we saw a woman when coming in, she took everything, not only from the system, (but also) from the people in the room. It's a interesting time as a researcher, an observer of this new process.

Any other question?

K- Let me explain before we go ahead. Dean is the cameraman and our TV side of the recording of all the people who come out of the, ... the flight unit. (2:34).

A lot of them don't want to give interviews. Some of them don't want to be there. And some they do. When I finish what I call, my interrogation and understand what they do. They go in the hands of Dean. So Dean sees the other side of them recording. Some of the recording you seen. All the recordings up to now from the EC is done by Dean, from the people who just come after talking to me. They go on the chair to talk with him. So you understand when he talks, he is literally listening to the back end of where they come out. They tell him more than they tell us, because now they're relaxed. Their not under pressure, or trying to remember something and telling us. Carry on Dean.

Q; Dean .. So I've noticed some people go in and they come out, and they say, I've not experienced anything. Through my understanding and through your teachings, I know that they've received a spectrum of energy, and they are in constant communication, constant flow of energy with the system, with the interaction of the soul and the system.

I've also noticed that some people that when they actually go in, and they do connect, and they remember this connection, they walk out and this deep, unconditional love behind their eyes. It's a hard thing to say, but there's like this overwhelming emotion, you see it through their, through the face. I can't describe it. I can see it behind their eyes. This undeniable, unconditional love sort of coming from them. And when you then speak to them, in an interview or something, you can see this overwhelming-ness just coming out of every part of their, their being. There's like an energy all around them. (2:36). And it is such an honor just to be present with them.

It's like it really is. That soul essence has been touched by that, magnificence of a soul. It's just, it's astonishing to be present afterwards and to, and an honor to be able to speak with these beautiful souls, incredible. It really is. So this is sort of a testimonial to the system, Mr. Keshe, to everything you've delivered. Thank you so much Mr. Keshe, what you've brought forward, for humanity is beyond words. I thank you from the bottom my soul for what you've done for humanity. I know you do so much. And I know people give a lot. But humanity, you need to understand what Mr. Keshe is brought forward here. It is quite unbelievable. And the team behind him, I've seen how wonderfully they work and all the Knowledge Seekers and all the Keshe Foundation, they are so devoted, and they bring this knowledge forward to help humanity and it's astonishing. Thank you Mr. Keshe. And thank you the team, Klaus and everybody involved. You are just such beautiful souls, it's remarkable. And it's an honor to be present with you all. ..

So Mr. Keshe, the emotion behind the eyes, the emotions, that's what it really (is about). That's what's touched me when I see people come out. There's also something else I'd like to say. I've not been in the system.

K- You are not allowed in the system.

Q: .. I've been around these entities for a little while now. And what you spoke about earlier on, I've experienced briefly. So this was one of those positions where I was speaking to an Austrian person. And for a brief like 10, 15, 20 seconds maybe, they spoke and I totally understood everything they said. And I thought how did I know that? This was going back three or four months ago, (2:38). and then you've come forward and spoken about this today. So I've experienced this very briefly. That language thing, is yeah, that touched me when you when you spoke about that today.

People see the light - they see their own soul speaking to them

K- What we see a lot of people coming out of the system, but a good percentage, large percentage, they speak about the light. They speak about light inside them, within them. In a way they recognize their own soul. And a lot of them when they see, in their travels, something else, that says, "I am you, I am your soul in front of you." And it's very funny when they speak to you, because they see their own soul speaking to them.

We had a couple of ladies in that position, that I am your soul. I'm so, what you. I am you, as they say. They receive enlightenment, and it touches them. They see beauty and

touches them. But they see the beauty of themselves. And that is the beautiful thing about it.

We see them coming out of these systems, and some of them change. I am in communication with some of the Knowledge Seekers (KS) who have been through, and especially, if they came with a partner, they see the change in the partner. How life changes for them. You don't see, you are not mainly aware of your own changes, but if you go in with a partner, you will feel that change. And you feel the beauties of what that change has brought. (2:40). Less fighting, less argument it's more pleasure. Everything has changed. When you speak to them out. Everything is so harmony.

Yesterday I was. I witnessed this in a beautiful way between a couple, and how they care different way. The woman says, I have a new partner. It touches them, it touches the soul. It elevates the soul. We see it when they come out. The eyes are different, the emotions are different. It's nice to see both ends of what I call, the work of what we produce, the systems, and what we see the system produces. At the end of it, what comes out of it. It's so beautiful, ?? wonderful ?? set up

Q: .. One thing I'd like to say is, all the nations, all the people going through, coming through having this flight experience, they're drawn in, they feel this. I'm speaking for myself, obviously, I don't know this for sure. However, it seems that they're drawn in as a soul, to come to the Center. They experience the technologies. Some report that they feel these, the field strength, the moment they walked through the door. And ... one of the Knowledge Seekers said, they actually don't need anything else, they received everything they need the moment they walked through the front door. From my understanding, I think they may have received this even before they walked through the front door.

And then there's other people, (2:42). that when they then speak afterwards, I've noticed that there's a deep soul resonance, or connection in the physicality, where the information gets. There was a couple yesterday that, first of all, one of the couples spoke and they couldn't express themselves much. Then their partner spoke. And then they wanted to come back again. And then the conversation that I'm supposed to do these interviews for a certain period of time, and then it's very difficult not speaking the language, to stop the mid flow, and say can you shorten it, so that we can get this into a Knowledge Seekers. ... So we can shorten it enough, so that we can use it within the Knowledge Seekers Workshop that you hold, like this one right now. So it's difficult to .. I don't know what I want to say now. I've sort of lost my own track.

K- You got carried away

Q: So what it is, it's the emotion of this? People are experiencing it in very deep profound ways. And I've noticed that some are in the in the STP, are experiencing some body shifts. And understanding they believe, or in their own understanding, that, that's what they've received. And then another soul responds, that the STP, that position was opened up, a whole spectrum of energies for them. And then others described they go into

another position, the third position, and they then start to feel that flight , .. flight enhancement.

However, and I have not been in there (in the EU). (2:44). So I openly admit this to everybody.

K- We won't let you in there.

Q: Yeah, I know you won't let me in there, Mr. Keshe.

K- Let me explain to people exactly what you're going to get, when you get Dean. When you come out it's us, we're looking for facts. When you go to Dean, it's just like sitting with a grandpa and telling your story. It's the confession time to grandma, I call it. It's very different then what they talk to us. He sits there and he says, "oh yes, very much." You know the way the grandmas looks after the baby, the children, grandchildren. And he pampers them up, for them to go through the full emotion of what they felt. It's amazing to see.

Now and then, I get a message, "oh, you know, they forgot to tell us this, they are telling it to Dean. So it's what I call, Mrs. Doubtfire, if you know the movie. You're going on the chair there, to do, the confession box of the emotion, and not the way we look at it. In a systematic way to find the solutions, to understand what the parameters of our work are.

Thank you very much Dean for your work. It's amazing. I sometimes watch him, how he goes through them, because we are in the next, in the same area. While I'm talking with the new people coming out, he's interviewing the one's who already been out, and they've gone through what we call, the investigation. And it's very, very nice.

But one thing is, all of them, they speak about, when they go to the systems 3, 2, 1. They speak about landing. It's just like they say, it's like an aircraft landing, and they come back to dimension. They know, this trip is over. It's just like going on holiday, (2:46). one says. When you go on the last seat to come out, you know that's it, the journey is over, the holiday time is over. And a lot of them loose sense of time. The guy came out and says, have I been in there that long? I was just. I thought I was there just a half an hour, or so. When he has been there two, two and a half hours.

This is the beauty of ... traveling with the soul, it has no time. A lot of them don't like me going in there and telling them, "excuse me, do you mind if you move, this seat is needed for another person to go through." Some of them are so deep. I had this experience, on Tuesday, the lady was in the unit and I said to her. I thought she was looking at me, but she wasn't looking at me in the room, in the system. And I said excuse me, do you mind, and she went jumping, I woke her up from sleep. I got frightened more than she did, that I had to leave the room.

Because they go into a different, different structure of mind. In a lot of people come out, they talk about dimension, that there different .. It's not the dimension. It's the same life. Now, you've got used to what is inside you, to be outside, and you can enjoy both. That's

the only way I can describe it. It's the first time you have collaborated, you have worked openly with your soul. And this is what a lot of you don't understand.

Up to now it was something imaginary, somewhere the priest told you is your soul, and it goes to heaven, or hell, or whatever. But now it's the first time in these machines, you and your soul working together. I listen to the physicality of the man, what they tell you. I tell you, and you do, carry on, take us where you want. That's all it is. (2:48).

This is what we promised from the beginning, to free that bird from the cage. Now that bird goes everywhere and brings you messages back, but you are with it. You actually rely on it, to go, what do you call it, outpost in the dimension of the universe. It's beautiful what we see, and if you understand it. It's not just a talk, somebody came and said this and that. It's the first time the STM and the physicality of the Man are working together.

I know what these people say, because they are humans, I've got carried, the body of the human, and so I tell you what to do. They both listen. Up to now you ?? dreamt, and the soul was inside. Now the soul is outside, and he tells the physicality what to do, because you've got to take me there. I don't have to, I just sit there. You're a plasma. And that's why with the body of the man you fly. With Soul of the Man you go to places.

That's why I say in the flight system, I say, try to go to Moon. Try to go to see your uncle, or your father, or your children. You don't fly to the Moon. And if you are in a physical dimension, I tell you, would you like to fly. (They answer,) "yes, yes, I like to fly," but I didn't fly, I just went there. You don't realize that you actually, instantaneously (went there).

Humanity for the first time has learned the collaboration openly, between the STM and Physicality of the Man, in a environment created, for man to have that freedom, and pleasure. This is the beauty of it. It's the first time you work with your soul. It's the first time you have the freedom. You have the understanding, that I don't need to wait to dream. I want to see the mom, I see the mom. Because I know somebody who can take me, who knows where it is. (2:50). And if I don't see the mom, it means she's busy, she didn't want to see me. It's like in a real life, you call Mom, but Mom is not home. Mom has gone out for a party, so you have to wait till next time.

We've seen that yesterday, in the people who came in for the second time to go through the system. As Dean said, some people don't go through that, because partially our system is not set up. Partially, the soul is too scared to move out, to do anything. And partially they feel, they come in to do something. But if I let my soul go, "oh, what's going to happen? I can't get it back." So I want to be in the system, but I don't want to let it go.

Yesterday we had a guy he was crying, and crying, and crying. From seat one, he started crying. He was in the seat number two, he was crying, and he was crying so loud. He went into the system he was crying louder. I said to the guy, can you get him out, because

he's got so many ?? ?? And when he came out, I said, Why were you crying? What happened? He said, I wanted to fly, but I couldn't fly. So I was so angry with myself, because I couldn't fly. And I said, this is where he has gone wrong. Physicality is still trying to control the soul.

And yes, it's the first time in the life of the man, a system allows you to expand, to free your soul, but it still be that bird in the cage. Most of the time, we are the cage, and the soul is the bird. Now, the soul is the cage and we are the bird inside. The way we've been kind to our soul, the soul is kind to us. We work together. And this is what the whole purpose of this technology. (2:52).

You want to go to New York get on a physical plane, spend 10 - 12 hours in airports and everything else. Let the soul out, take it to New York, change the clothes, let the soul in , and you're out. That's all (it is). In a very new near future, many of you will do this, because now you learned it. We see people coming back for the second time. People will come back for a fourth time, for a fifth time and they will learn it, and they will show you how it is, how it is done.

I am a very patient man, a few weeks more waiting for the first Knowledge Seekers go through this transmutation. It's not that long, I waited thousands of years. But it's the beauty of it. For the first time, we let you do and work with something, which you engaged, and you denied yourself to, for millions of years. Not only the man, even the passengers of the U.

Any other questions?

Q: ... Sorry, can I just ask just one last question. So, for the souls entering into the system, will they in the moments to follow be able to .. So they are going in and they're experiencing, say they are traveling to see, their parents, or they're going to the Moon, or they're going to the Sun, or they go to a distant galaxy? Wherever they need to be?

Will there be a moment, when this soul will be able to be in more than one location in the moment?

K- In a way, yes. It can be. What will be interesting is, when we get the first people who are diagnosed with "beautiful people" in them, (2:54). what you call, schizophrenic, and see how the two souls of individuals would take shape in, and if they participate by ?? portrayal, by one, or two, or 10 of them.

This system will throw a new spanner in the works of the medicine and psychology. Where the mothers come with the children with diagnosed schizophrenic, with two character, three characters, and have to sit and watch, that all these characters come out together and play. It will happen sooner or later. It's inevitable, it will happen.

That will be a pleasure. Then you'll see when I tell you for years, that individuals trapped in one physicality. It'll be really interesting how they shine, how they will show themselves when they come out. Will all three become independent speakers of what they

went through. Or they have to listen to the one ?? who always talks in the physical D. But talk to them inside, and talk to them outside, and see if they match.

A wonderful time has come forward for humanity to know and see, what they've done with their own children in mental hospitals, and institutions, and injections for decades. Because they never understood the truth about the creation. I'm looking forward to that, it's one of my deepest, deepest wishes to have the first schizophrenics, you call it, what I call "Beautiful People," in the system. I worked on it for nearly 30 years. To prove, to show, to bring respect to these people, and not shame, and what we've done to them to castrate them.

Any other question? (2:56).

R: Not seeing questions .

K- That' very good. It's fantastic. It means Knowledge Seekers are now learning and ?? digesting understanding.

Q: ...

K- We call it a day. And I think, as we said, the time of the change is there. We have gone and endeavored to put in the new Enhancement Unit for energy out, and new health centers to be done in Rome. And the biggest gift we could gift we could give the Iranian nation, was, that Iran will commit itself to what we call, safe nuclear power stations around the world, by containment, and not by destruction.

Thank you very much for today. And hopefully we'll have more news next week. Thank you, Rick.
